With proven pedagogy that emphasizes critical-thinking, problem-solving, and in-depth coverage, New Perspectives helps students develop the Microsoft Office 2013 skills they need to be successful in college and beyond. Updated with all new case-based tutorials, New Perspectives Microsoft Access 2013 continues to engage students in applying skills to real-world situations, making concepts relevant. A new Troubleshoot case problem enhances critical thinking, and a new tutorial on Managing Your Files helps students navigate Windows 8. As always, New Perspectives improves learning outcomes and transference of skills by helping students understand why what they're learning is important. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The easy, visual way to learn this popular database program Part of the Office 2013 productivity suite, Access enables you to organize, present, analyze, and share data on a network or over the web. With this Visual guide to show you how, you'll master the fundamentals of this robust database application in no time. Clear, step-by-step instructions are illustrated with full-color screen shots that show exactly what you should see on your screen. Learn to enter new records, create, edit, and design tables and forms; develop queries that generate specific reports; add smart tags to your tables; and much more. While it is the most widely used database application, Access is not particularly intuitive; the Visual system's two-page lessons and full-color screen shots make this complex software easier to learn Concise, step-by-step instructions and clear illustrations show you exactly what to expect Covers scores of tasks, including entering and setting up new records, organizing and sharing data, designing tables and forms, and generating reports Shows how to perform more complex operations, such as finding dependencies between database objects and adding smart tags to tables Teach Yourself VISUALLY Access 2013 uses clear steps and high-resolution screen images to get you up and running with this popular database program.

Presents a guide to the latest version of the database management application, covering such topics as creating databases and tables, setting up queries, producing reports, building forms, and using macros --

In this Microsoft Access 2013 training course, expert author Guy Vaccaro teaches you how to use Access to create a database and build an interface to retrieve and report on your data. This course is designed for the absolute beginner; no prior database design or Microsoft Access experience is necessary in order to get the most out of this video tutorial. Starting with a tour of the interface, this computer based training video will show you how to design and create a table, build queries, and comprehensively demonstrates the creation, and functions, of forms and reports. As you move through the video tutorial, Guy covers other topics such as; how to create advanced forms, customizing your reports, and building action queries. Finally, he will take you through the process of creating your own custom web app with Access 2013. By the completion of this training course, you will be capable of creating databases as well as reports and forms in Microsoft Access 2013, and you will have in-depth knowledge of the tools and functions available to you in this software. Working files are included, allowing you to follow along with the author throughout the lessons.

Beginners will get the answers they need in a colorfully illustrated book employing a unique approach to simple tasks—each double-page spread presents an illustration of one goal and a graphic explanation for every step leading to that goal. Original. (Beginner).

Make the most of Access 2013—without becoming a technical expert! This book is the fastest way to master Access and use it to build powerful, useful databases of all kinds—even web application databases! Even if you've never used Access before, you'll learn how to do what you want, one incredibly clear and easy step at a time. Access has never, ever been this simple! Who knew how simple Access® 2013 could be? This is the easiest, most practical beginner's guide to using Microsoft's incredibly powerful new Access 2013 database program... simple, reliable instructions for doing everything you really want to do! Here's a small sample of what you'll learn: • Create tables to efficiently store and navigate your data • Build queries that retrieve exactly the information you want • Design intuitive forms that help your users work more efficiently • Build reports that answer key questions intuitively and visually • Learn easy techniques for designing more reliable databases • Work faster with AutoForms, AutoReports, and other shortcuts • Automate repetitive tasks and build more polished databases with macros • Share Access data with Excel, SQL Server, and other applications • Solve complex problems with advanced query, form, and reporting techniques • Build modern web databases that serve users through browsers • Run your database on the cloud through Microsoft Office 365 • Construct a complete database application from start to finish • And much more... Alison Balter, President of InfoTech Services Group, Inc., has spent 25 years training and consulting on Microsoft Access and related applications with top organizations such as Cisco, Shell, Accenture, Northrop, the U.S. Drug Enforcement Administration, Prudential, Transamerica, Fox Broadcasting, and the U.S. Navy. She travels throughout North America delivering seminars on Access and has authored 14 books and videos for Pearson, including Microsoft Access 2010 LiveLessons and Alison Balter's Mastering Access 2007 Development. She is past president of the Independent Computer Consultants Association of Los Angeles. Category: Databases Covers: Microsoft® Access® 2013 User Level: Beginning

"This course is an introduction to Microsoft Access 2013. In this course, students will become familiar with various database components, concepts, and terminology. Students will tour the user interface, create databases, create objects, perform calculations, navigate and work with tables, understand and work with queries, review and work with various reports and reporting features, and review forms and the various tools that go along with them. This course will give the student the required knowledge to complete the Access 2016 Intermediate course."--Resource description page.
