Life Span Development and Personality on B.F. SKINNER ...

Life Span Development and Personality on B.F. SKINNER ...

Personality Development across the Lifespan examines the development of personality characteristics from childhood, adolescence, emerging adulthood, adulthood, and old age. It provides a comprehensive overview of theoretical perspectives, methods, and empirical findings of personality and developmental psychology, also detailing insights on how individuals differ from each other, how they change during life, and how these changes relate to biological and environmental factors, including major life events, social relationships, and health. The book begins with chapters on personality development in different life phases before moving on to theoretical perspectives, the development of specific personality characteristics, and personality development in relation to different contexts, like close others, health, and culture. Final sections cover methods in research on the topic and the future directions of research in personality development. Introduces and reviews the most important personality characteristics Examines personality in relation to different contexts and how it is related to important life outcomes Discusses patterns and sources of personality development

Life-Span Developmental Psychology: Personality and Socialization presents papers on personality and socialization. The book discusses the history, theory, and psychological approaches of developmental psychology, with focus on socialization and personality development through the life span; personality dimensions; and theories of socialization and sex-role development. The text also describes the life-span perspective of creativity and cognitive styles; continuities in childhood and adult moral development revisited; and issues of intergenerational relations as they affect both individual socialization and continuity of culture. The interactional analysis of family attachments; social-learning theory as a framework for the study of adult personality development; person-perception research; and the perception of life-span development are also considered. The book further tackles the potential usefulness of the life-span developmental perspective in education; the strategies for enhancing human development over the life span through educational intervention; and some ecological implications for the organization of human intervention throughout the life span. Developmental psychologists, sociologists, gerontologists, and people involved in the study of child development will find the book invaluable.

K. Warner Schaie I am pleased to write a foreword for this interesting volume, particularly as over many years, I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague, mentor, or research collaborator. The editors begin their introduction by asking why one would want to read yet another book on human development. They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development. This volume provides a positive remedy to past deficiencies in volumes on hu man development with a well-organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure. This approach does not surprise. After all, the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin, whether as students, junior scientists, or senior visitors. That institute, under the leadership of Paul Baltes, has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality. Over the past two decades, it has influenced the careers of a generation of scientists who have advocated long-term studies of human development in an interdisciplinary context.

Life Span Development and Personality on B.F. SKINNER ...

Helps students understand how culture impacts development in adolescence and emerging adulthood. Grounded in a global cultural perspective (within and outside of the US), this text enriches the discussion with historical context and an interdisciplinary approach, including studies from fields such as anthropology and sociology, in addition to the compelling psychological research on adolescent development. This book also takes into account the period of "emerging adulthood" (ages 18-25), a term coined by the author, and an area of study for which Arnett is a leading expert. Arnett continues the fifth edition with new and updated studies, both U.S. and international. With Pearson's MyDevelopmentLab Video Series and PowerPoints embedded with video, students can experience a true cross-cultural experience. A better teaching and learning experience– for you and your students. Here's how: Personalize Learning – The new MyDevelopmentLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking – Students learn to think critically about the influence of culture on development with pedagogical features such as Culture Focus boxes and Historical Focus boxes. Engage Students – Arnett engages students with cross cultural research and examples throughout. MyVirtualTeen, an interactive simulation, allows students to apply the concepts they are learning to their own "virtual teen." Explore Research - "Research Focus" provides students with a firm grasp of various research methods and helps them see the impact that methods can have on research findings. Support Instructors - This program provides instructors with unbeatable resources, including video embedded PowerPoints and the new MyDevelopmentLab that includes cross-cultural videos and MyVirtualTeen, an interactive simulation that allows you to raise a child from birth to age 18. An easy to use Instructor's Manual, a robust test bank, and an online test generator (MyTest) are also available. All of these materials may be packaged with the text upon request. Note: MyDevelopmentLab does not come automatically packaged with this text. To purchase MyDevelopmentLab, please visit: www.mydevelopmentlab.com or you can purchase a ValuePack of the text + MyDevelopmentlab (at no additional cost): ValuePack ISBN-10: 0205911854/ ValuePack ISBN-13: 9780205911851. This is the little book that started a revolution, making women's voices heard, in their own right and with their own integrity, for virtually the first time in social scientific theorizing about women. Its impact was immediate and continues to this day, in the academic world and beyond. Translated into sixteen languages, with more than 700,000 copies sold around the world, In a Different Voice has inspired new research, new educational initiatives, and political debate—and helped many women and men to see themselves and each other in a different light.

These stimulating companion volumes reflect an expansion of the coverage of Wrightsman's earlier book Personality Development in Adulthood. They encourage readers to look at the evolving nature of their own lives, and include case studies throughout to illustrate concepts in a thought-provoking, non-technical manner.

When a local context really makes the difference... The new edition of this original Australian text continues to offer the most balanced coverage of theory and research for Australian students and educators and appeals to students from many backgrounds. It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

First published in 1994, Routledge is an imprint of Taylor & Francis, an informa company.

Textbook for undergraduate students of human development courses written by Australian psychology academics. Looks at developmental phases in childhood, adolescence, adulthood and late adulthood and includes bibliographies, topics for further research and an index.
