~~Chevy Venture Evap Vent Valve Location~~

The EVAP canister vent control valve is located on the EVAP canister and is used to seal the canister vent. This solenoid valve responds to signals from the ECM. When the ECM sends an ON signal, the coil in the solenoid valve is energized. A plunger will then move to seal the canister vent.

~~Nissan Altima 2007-2012 Service Manual: P0448 evap ...~~

The EVAP system traps this vapor in a charcoal canister and recirculates it for use as fuel for the engine and prevented from polluting the environment. The canister purge solenoid – also referred to as an EVAP canister valve – is responsible for “purging” the EVAP system by acting as the switch that allows the vapor into the engine.
