A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

This book is meant for students of accounting, management and business studies. It not only describes the principles, procedures and techniques of management accounting, but also explains and analyses the core concepts that have driven the development of the subject for decades. The book is a perfect blend of conceptual and practical approaches to accounting. NEW IN THIS EDITION Completely revised and updated New chapters on strategic management accounting, product costing, and service costing Coverage of total quality management (TQM), just-in-time (JIT), life cycle costing, and Kaizen costing Worked out solutions to problems and latest professional examination questions

Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this market leading text. Garrison is your guide through the challenging waters of managerial accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Managerial Accounting8ce focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course.

Warren/Reeve/Duchac ' s MANAGERIAL ACCOUNTING 14E provides a solid foundation in managerial accounting fundamentals, while motivating students to learn by showing how accounting is important to business. Business examples and a new chapter schema provide context for readers, demonstrating how each chapter ' s content fits into the big picture, connecting fundamental concepts with real businesses. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Topics include short-run and long-run decisions, joint and by-products, service department cost allocations, measuring and interpreting variances, cost allocation to various divisions, costing, contribution margin, gross margin, mix, yield, revenue variances, control of decentralized operations, planning, control and capital rationing, operations management, and pricing of products and services.

The 5th edition of Management Accounting: Principles and Applications helps students master the complexity of cost and management accounting. Using a clear, concise writing style, logical structure and current accounting standards, the text focuses on the information students need to complete their course.
