UpToDate

The fetal sacrum does need to be maintained anteriorly, which can be done by holding the fetal pelvis. However, occasionally the baby does not deliver spontaneously, and some specific manoeuvres are required: Flexing the fetal knees to enable delivery of the legs. Using Lovsett's manoeuvre to rotate the body and deliver the shoulders.

Breech Presentation - Risk Factors - Management - TeachMeObGyn

Women with an unstable lie (transverse, oblique) at 37-38 weeks gestation should be advised that admission to hospital for inpatient observation until the lie stabilizes or delivery is achieved is the preferred option. If a woman declines admission, both the woman and her partner should be advised to contact their

Clinical Practice Guide - Cord Prolapse - HSE.ie

With transverse, oblique or unstable lie, elective admission to hospital after 37+0 weeks of gestation should be discussed and women in the community should be advised to present urgently if there are signs of labour or suspicion of membrane rupture. Women with non-cephalic presentations and preterm prelabour rupture of membranes should be

Green-top Guideline No. 50 - RCOG

Suggestions for Unstable Lie. The main thing I suggest for unstable lie is the same as for the persistent breech. Seven (7) Forward-leaning Inversions (FLI) in one 24 hour period, about 15 minutes to 2 hours apart. Do not set an alarm to wake yourself, sleep is paramount! Do not do FLI after eating or during heartburn.

When a Person Is Told They Have an Unstable Lie - Spinning ...

The surgeon may be able to rotate the fetus through the wall of the uterus once the abdominal wall has been opened.

Otherwise, a transverse uterine incision is needed to gain access to a fetal pole.

Internal podalic version is no longer attempted. Transverse lie is associated with a risk of cord prolapse of up to 20%.

Malpresentations and Malpositions Information | Patient

No fetal anomaly incompatible with vaginal birth. 2, 3 Absence of fetal or maternal compromise Continuous fetal heart rate monitoring during labour. 3 Spontaneous onset of labour. Note: For criteria and management of a vaginal breech birth see sections in this document: Breech – Vaginal Birth Management and
