After his return to the United States, Dr. Keat served as manager in the pricing area of one of the company's manufacturing groups. Before leaving IBM, in 1987 he was associated with the company's International Finance, Planning and Administration School (IFPA), where he taught managerial economics, lectured on finance in a number of company-related courses, and managed academic courses.

Illustrating the theory of managerial economics with an integrated case on the soft drink industry, this

text shows students how to solve real business problems by enabling them to apply economic principles to everyday business activity.

The fifth edition of 'Managerial Economics' includes: a new chapter on the multinational corporation and globalization, new examples throughout the text, specific lists of learning objectives, and a greater focus on the application of regression analysis and forecasting to business problems.

This distinctive book features a running case study at the beginning and end of each chapter that explores the decision-making processes of managers within a hypothetical company. It creates a vivid, dynamic business setting that highlights microeconomic theory and the tools of quantitative analysis used in management decision-making. In addition, actual business examples from the popular press—including numerous international examples—are incorporated into the chapters to reinforce the connection between economic and real business situations. Chapter topics cover supply and demand, demand elasticity, demand estimation, forecasting, the theory and estimation of production, the theory and estimation of cost, competition and monopoly, monopolistic competition and oligopoly, special pricing practices, economic decision making in the 21st century, capital budgeting, and risk and uncertainty. For today's managers in government and industry.

For upper-level undergraduate and first-year MBA courses in managerial and applied economics. This Global Edition has been edited to include enhancements making it more relevant to students outside the United States This text will excite readers by providing a more linear progression, while proving the consistency and relevance of microeconomic theory. The Seventh Edition welcomes a new co-author, Stephen Erfle of Dickinson College, who has contributed many revisions and improvements to the quantitative sections of the text, as well as provided a major addition: the use of Excel in the presentation of many of the numerical and graphical illustrations presented throughout the text. To strengthen students' ability to use Excel—a critical skill in today's job market—new Excel Applications (Excel Apps) allow readers to turn the static figures and tables in the text into dynamic illustrations.

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Directed primarily toward undergraduate/MBA students in Economics, this text also provides practical content to current and aspiring industry professionals.
