"Introduces ways to use film to introduce complex literary theories to students, coupling works of literature with attendant films to encourage classroom discussion. Includes psychoanalytic criticism, cultural criticism, and thematic criticism. Then offers a survey of the image patterns into which film adaptation theories can be grouped and how these theories relate to literary theory"--Provided by publisher.

50 Powerful, Easy-to-Use Rules for Supporting Hypergrowth in Any Environment Scalability Rules is the easy-to-use scalability primer and reference for every architect, developer, web professional, and manager. Authors Martin L. Abbott and Michael T. Fisher have helped scale more than 200 hypergrowth Internet sites through their consulting practice. Now, drawing on their unsurpassed experience, they present 50 clear, proven scalability rules—and practical guidance for applying them. Abbott and Fisher transform scalability from a " black art " to a set of realistic, technology-agnostic best practices for supporting hypergrowth in nearly any environment, including both frontend and backend systems. For architects, they offer powerful new insights for creating and evaluating designs. For developers, they share specific techniques for handling everything from databases to state. For managers, they provide invaluable help in goal-setting, decision-making, and interacting with technical teams. Whatever your role, you ' ll find practical risk/benefit guidance for setting priorities—and getting maximum " bang for the buck. " • Simplifying architectures and avoiding " over-engineering " • Scaling via cloning, replication, separating functionality, and splitting data sets • Scaling out, not up • Getting more out of databases without compromising scalability • Avoiding unnecessary redirects and redundant double-checking • Using caches and content delivery networks more aggressively, without introducing unacceptable complexity • Designing for fault tolerance, graceful failure, and easy rollback • Striving for statelessness when you can, efficiently handling state when you must • Effectively utilizing asynchronous communication • Learning quickly from mistakes, and much more

For fans of E. L. James, Sylvia Day and J. Kenner, Tara Sue Me became a worldwide phenomenon with her enticing and scandalous Submissive series which enthralled millions. Now she presents a scorching tale about a risky passion too hot to ignore... Julie Masterson craves a taste of danger, but she's never given in to her curiosity about putting her body in someone else's power - until a chance meeting with Daniel Covington, the irresistible Senior VP of Weston Bank, draws her into a seductive new world of sexual experience. Daniel is highly respected within his community, but he hasn't had an exclusive relationship for more than two years. Yet Julie's eager innocence is making him rethink his feelings about commitment. As their sizzling connection heats up, Daniel is ready to take Julie fully under his command. And Julie will have to decide if she trusts him enough to surrender completely - if she should escape before she gets burned... Before there was the fan fiction that became Fifty Shades of Grey, there was The Submissive... Indulge in the series that started it all: The Submissive, The Dominant, The Training, The Chalet, The Enticement, The Collar, The Exhibitionist and The Master.

Roger Bate has spend years on the trail of counterfeit medicines in Asia, Africa, and the Middle East, learning the anatomy of a nebulous, far-reaching black market that has resulted in countless deaths and injuries around the world. Phake: The Deadly World of Falsified and Substandard Medicines is the culmination of Bate's research and travels—both a fascinating first hand account of the counterfeit drug trade and an incisive policy analysis with important ramifications for decision makers in the U.S. Food and Drug Administration and the international World Health Organization.

According to the Pew Foundation, ' s "Internet in American Life Study," over 60 million Americans per year use the Internet to search for health information. All those concerned with healthcare and how to obtain personally relevant medical information form a large additional target group Many Medical Informatics programs—both in the United States and abroad—include a course in Consumer Health Informatics as part of their curriculum. This book, designed for use in a classroom, will be the first textbook dedicated solely to the specific concerns of consumer health informatics Consumer Health Informatics is an interactive text; filled with case studies and discussion questions With international authorship and edited by five leaders in the field, Consumer Health Informatics has tapped some of the best resources in informatics today

The author provides an introduction to patient counselling for pharmacy students and practicing pharmacists. She outlines the various ways of incorporating effective patient counselling into pharmacy practice and gives specific recommendations for developing strong counselling techniques.

Crystal engineering - where the myriad of intermolecular forces operating in the solid-state are employed to design new nano- and functional materials - is a key new technology with implications for catalysis, pharmaceuticals, synthesis and materials science. Frontiers in Crystal Engineering gathers personal perspectives, from international specialists working in molecular aspects of crystal engineering, on the practical and theoretical challenges of the discipline, and future prospects. These demonstrate the approaches that are being used to tackle the problems associated with the complexity, design and functionality of crystalline molecular solids. Topics include * how intermolecular forces direct and sustain crystal structures * functional engineering and design elements * coordination polymers and network structures * applications in green and pharmaceutical chemistry Frontiers in Crystal Engineering is a useful guide to this exciting new discipline for both entrants to the field as well as established practitioners, and for those working in crystallography, medicinal and pharmaceutical sciences, solid-state chemistry, and materials and nanotechnology.

This book focuses on host-pathogen interactions at the metabolic level. It explores the metabolic requirements of the infectious agents, the microbial metabolic pathways that are dedicated to circumvent host immune mechanisms as well as the molecular mechanisms by which pathogens hijack host cell metabolism for their own benefit. Finally, it provides insights on the possible clinical and immunotherapeutic applications, as well as on the available experimental and analytical methods. The contributions break new ground in understanding the metabolic crosstalk between host and pathogen.

This text gives biographical accounts of the leading plant collectors and their activities in Southern Africa from the days of the East India Company until modern times.
