Fundamentals of Microbiology, Twelfth Edition is designed for the introductory microbiology course with an emphasis in the health sciences.

*1 Clinical history, clinical correlations with placental pathology and prematurity The initial steps in the process of perinatal nervous system evaluation, namely the planning of the optimal approach and choice of samples to be obtained, are driven by the clinical context. Of key importance are the following data. a. Gestational age at time of demise (if stillborn); or gestational age and postnatal age (if liveborn), for comparison with normative standards of development (see Appendix); b. State of maternal health (age, parity, pre-existing medical conditions or ones appearing during gestation or around the time of delivery, exposure to medications/toxins/infections), and of health of siblings or other family members: - Concerns for inherited (i.e., genetic) conditions, metabolic disorders, congenital infections, etc., may indicate the need for special testing; c. Details of prenatal course, including any imaging, amniocentesis, or monitoring: - Prenatal imaging modalities most commonly consist of transabdominal ultrasonography, generally done at the time of the first prenatal visit (to confirm pregnancy) or more usually in the mid-second-trimester for detection of fetal or placental anomalies"--

On June 11 and June 12, 2019, the National Academies convened a workshop to explore the growing understanding of how the interplay between humans and microbes affects host physiology and causing noncommunicable diseases. Discussions included an overview of colliding epidemics, emerging research on associations between infectious and noncommunicable diseases, risks posed by chronic diseases to the development and severity of infectious diseases, and the influence of the microbiome. Workshop participants also examined the challenges and opportunities of convergence, the integration of health care delivery models and interventions, potential approaches for research, policy, and practice in the immediate-term, and potential directions for the long-term. This publication summarizes the presentations and discussions from the workshop.
