Provides information, case studies, and cameos for teachers on how to conduct research in their classroom.

At a time when people are living into their tenth decade, the longest longitudinal study of human development ever undertaken offers welcome news for old age: our lives evolve in our later years and often become more fulfilling. Among the surprising findings: people who do well in old age did not necessarily do so well in midlife, and vice versa.

A Teacher's Guide to Classroom Research is a great "one-stop" guide for student or qualified teachers looking to undertake classroom research.

Bond Assessment Papers for 9-10 years have been designed by Bond, the number 1 provider of 11+ practice materials. These books provide practice questions that begin to establish the core skills for success in English, Maths, Non-verbal Reasoning and Verbal Reasoning.

Children with both giftedness and special educational needs are often found in the mainstream classrooms. This essential resource provides an overview of existing knowledge about dual and multiple exceptionality (DME), examining the needs of gifted and talented children from both the class teacher's and SENCO's perspectives. Diane Montgomery explores both the specialist interventions that some children will need at least for part of their school life, as well as the general inclusive provision that every school can develop to meet the needs of all children. Focusing on evidence-based identification throughout, chapters in this accessible book cover: An analysis of the terms 'giftedness and talent' and the different methods that can be used for identifying them and assessing their limitations Identifying and supporting a range of difficulties, syndromes and disorders such as dyslexia, dyscalculia, DCD, ASD, ADHD and SEBD How to manage classroom behaviour, improve school ethos and create a DME-friendly school through inclusive teaching and learning This invaluable resource will assist you in creating a DME friendly school, help to integrate learners with a range of difficulties and enable them and others to learn.

A guide explaining horrible fancy words, like homophone, connective and hyphen, that can make studying English difficult. It contains concise definitions in plain English with plenty of examples and is designed to help people understand and use these terms all the way through KS3 English.

Bringing together a wide collection of ideas, reviews, analyses and new research on particulate and structural concepts of matter, Concepts of Matter in Science Education informs practice from pre-school through graduate school learning and teaching and aims to inspire progress in science education. The expert contributors offer a range of reviews and critical analyses of related literature and in-depth analysis of specific issues, as well as new research. Among the themes covered are learning progressions for teaching a particle model of matter, the mental models of both students and teachers of the particulate nature of matter, educational technology, chemical reactions and chemical phenomena, chemical structure and bonding, quantum chemistry and the history and philosophy of science relating to the particulate nature of matter. The book will benefit a wide audience including classroom practitioners and student teachers at every educational level, teacher educators and researchers in science education. "If gaining the precise meaning in particulate terms of what is solid, what is liquid, and that air is a gas, were that simple, we would not be confronted with another book which, while suggesting new approaches to teaching these topics, confirms they are still very difficult for students to learn". Peter Fensham, Emeritus Professor Monash University, Adjunct Professor QUT (from the foreword to this book)

This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching. It offers an overview of scholarship and research in the field, and introduces the ideas and evidence that guide it.

The White Paper sets out the Government's proposals to further reform the management of schools in England, with the aim of creating a system shaped by parental choice where schools have greater autonomy in admissions policy. Proposals include: i) the role of local education authorities confined to being a local commissioner of services rather than an education provider, with a focus on raising standards through spreading best practice and championing parental choice; ii) each school able to acquire a self-governing trust status (similar to the network of Academies) or become a self-governing foundation school; iii) an increased role for new providers and the creation of a national Schools Commissioner to drive change and to promote the development of trust schools; iv) an expansion in the number of Academies to 200 by the year 2010 and easier provision for independent schools to enter the state system; v) the weakest schools to be given one year to improve standards or face closure, whilst high performing schools will have reduced bureaucracy and a lighter touch inspection regime; vi) increased provision for free school transport for poorer pupils; and vii) the introduction of a right for teachers to discipline pupils.
