has developed over the last hundred years
and led to today's ubiquitous technology.

Assuming the knowledge of a typical
freshman course in classical physics, they
lead the reader through relativity, quantum
mechanics, and the most important
applications of both of these fascinating
theories. For Adopting Professors, a

Physics is a description of reality, and thus each topic begins with concrete observations and experiences that readers can directly relate to. We then move on to the generalizations and more formal treatment of the topic. Not only does this make the material more interesting and easier to understand, but it is closer to the
