The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West The development of the region's natural resources, especially oil The impact of a rapidly globalizing world economy on the Middle East

Forging the Modern World offers an accessible explanation of key transformations in global economic, political, and ideological relationships since the sixteenth century. Examining global history by exploring the ways historians construct the past, this text will help students reflect on how sources, methodologies, and trends shape how we perceive history.

Since 1750, the world has become ever more connected, with processes of production and destruction no longer limited by land- or water-based modes of transport and communication. Volume 7 of the Cambridge World History series, divided into two books, offers a variety of angles of vision on the increasingly interconnected history of humankind. The second book questions the extent to which the transformations of the modern world have been shared, focusing on social developments such as urbanization, migration, and changes in family and sexuality; cultural connections through religion, science, music, and sport; ligaments of globalization including rubber, drugs, and the automobile; and moments of particular importance from the Atlantic Revolutions to 1989.

How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. Empires in World History departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, Empires in World History offers a fresh approach to understanding the impact of empires on the past and present.

A dictionary records a language and a cultural world. This global history of lexicography is the first survey of all the dictionaries which humans have made, from the ancient civilizations of Mesopotamia, Egypt, China, India, and the Greco-Roman world, to the contemporary speech communities of every inhabited continent. Their makers included poets and soldiers, saints and courtiers, a scribe in an ancient Egyptian 'house of life' and a Vietnamese queen. Their physical forms include Tamil palm-leaf manuscripts and the dictionary apps which are supporting endangered Australian languages. Through engaging and accessible studies, a diverse team of leading scholars provide fascinating insight into the dictionaries of hundreds of languages, into the imaginative worlds of those who used or observed them, and into a dazzling variety of the literate cultures of humankind.
