Mortgage Valuation Models Embedded Options

Mortgage Backed Securities (MBS) are among the most complex of all financial instruments. Analysis of MBS requires blending empirical analysis of borrower behavior with mathematical modeling of interest rates and home prices. Over the past 25 years, the authors have been at the leading edge of MBS valuation and risk analysis. This book is a detailed description of the sophisticated theories ...

The chapter discusses several modeling approaches aimed at predicting prepayments and default rates given economic scenario, loan, borrower and collateral characteristics. Among those methods are predicting lifetime defaults and losses, roll rates, hazard rates, and dynamic transition rates. A dynamic transition model advocated by the authors combines attractive features of other models and ...
