Joe Muscolino's The Muscular System Manual: The Skeletal Muscles of the Human Body, 4th Edition is an atlas of the muscles of the human body. This approachable, yet detailed, musculoskeletal anatomy manual provides both beginner and advanced students with a thorough understanding of skeletal muscles in a compartmentalized, customizable layout.

Joe Muscolino's The Muscular System Manual: The Skeletal Muscles of the Human Body, 4th Edition is an atlas of the muscles of the human body. This approachable, yet detailed, musculoskeletal anatomy manual provides both beginner and advanced students with a thorough understanding of skeletal muscles in a compartmentalized, customizable layout. Each muscle spread shows the individual muscle drawn over a photo of the human body, with an arrow to indicate the line of pull of the muscle, and explains: the muscle name, the origin of that name, Greek and Latin derivations, pronunciation, attachments, actions, eccentric contraction function, isometric contraction function, innervation to two levels of detail with predominant levels in bold, and arterial supply to two levels of detail. This new edition also features robust Evolve resources, an updated art program, and new chapter review and critical thinking questions that encourage you to apply what you have learned to prepare for practice. UNIQUE! Overlay art, consisting of over 380 full-color anatomical illustrations of muscles, bones, and ligaments drawn over photographs, helps identify the positions of muscles and bones in the human body. UNIQUE! Electronic Muscle and Bone Review Program features a base photograph with a skeleton drawn in and a list of every muscle for each major region of the body so students can choose any combination of muscles and place them onto the illustration - allowing them to see not only the muscle attachments, but also the relationship among the muscles of the region. Complete muscle coverage in an easy-to-understand layout makes this text appropriate for novices to anatomy, as well as intermediate and advanced students. Content organized by body region and includes information on how muscles in that region function together and large drawings of the muscles of that region so you can go directly to the topic you are studying. Covers the methodology for each muscle with information for learning muscle actions to explain the reasoning behind each action - and encourage you to learn and not just memorize. A four-color, student-friendly design with sections clearly boxed throughout and checkboxes that help you keep track of what you need to learn and what you have mastered. Customizable format, with checkboxes and numbered lists in each muscle layout, presents basic muscle information for the beginning student in bold type and more advanced information in regular type. Palpation boxes include bulleted steps instructing how to palpate each muscle so you can apply this assessment skill in practice. Evolve website for instructors includes TEACH Resources, a Test Bank, and an image collection so instructors can easily access all of the materials they need to teach their course in one place - and track through the course management system provided via Evolve. Evolve website for students includes access to audio of the author reading aloud muscle names, attachments, and actions for the muscles covered in the book, labeling exercises, and more to enrich your learning experience. NEW! Chapter objectives summarize key points and give you a framework for what to expect as you read through each chapter. NEW! End-of-chapter review questions further reinforce material once you have read and studied the chapter. NEW! A critical thinking question at the end of each chapter engages you with the material and challenges you to apply information to real-world scenarios. NEW! Video clips demonstrating joint actions on Evolve bring to life the material presented in the Basic Kinesiology Terminology chapter, with live action video of the joint actions. NEW and UPDATED! Bony landmarks and more muscles added to the muscle program on Evolve so you can not only see even more muscle combinations, but also see the bony landmarks labeled for the region. UPDATED! Upgraded line drawings enhance your comprehension of each topic presented through visual representation.

"With more than 700 illustrations and a new full-color design, this manual presents all of the body's muscles in an easy-to-understand format. Its molecular approach lets you choose the level of depth you need - from simply the basics to the most advanced level." - back cover.

A clear, concise approach provides the anatomical information you need to excel in massage therapy! Know the Body: Muscle, Bone, and Palpation Essentials covers muscle identification plus attachments, actions, stabilization functions, nerve innervation, palpation, and treatment considerations for each of those muscles. Hundreds of full-color illustrations make it easier to learn muscle and bone identification, as well as bony landmarks. Written by expert massage therapy practitioner and educator Joseph E. Muscolino, Know the Body helps you learn — not simply memorize — the essentials of muscles, bones, and palpation. Winner of the 2012 Association of American Publishers PROSE Award, Nursing & Allied Health Sciences! Full-color, overlay-style muscle illustrations show anatomical structures and include origin and insertion labeling. An introductory overview includes chapters on terminology, the skeletal system, muscle function, and bone palpation. Coverage of bones includes the bones and bony landmarks for each body region. Review activities in muscle region chapters include short case studies highlighting common conditions related to specific muscles and review questions. Treatment considerations explain how to apply muscle and palpation knowledge in massage practice. An illustrated stretching atlas is included as the appendix. A companion CD includes an interactive review of muscles.

This complete, full-color atlas of bones and joints contains over 700 illustrations and explains how muscles function as movers, antagonists, and stabilizers so readers will truly understand how muscles function in the human body. It includes the bones, landmarks, and joints, as well as an introduction to the basics of how muscles function (beginning kinesiology). It also provides clinical applications related to the kinesiology concepts presented and includes an explanation of anatomical and physiological terminology that is needed for work in the musculoskeletal field. Finally, this book covers microanatomy and microphysiology, such as the sliding filament theory and the structure and function of fascia. Clinical applications throughout the text, as they relate to the kinesiology concepts covered, enable students to apply the knowledge learned in the classroom to clinical practice. Over 100 full-color photographs of every bone in the human body gives readers comprehensive coverage of bones not found in other kinesiology books. Clear, full-color line drawings that highlight each topic in the overview of the human body, joints of the human body, and muscle function parts. Thorough coverage of joints in six chapters that provide information on structure, function, terminology, and specific illustrations on each joint in the human body: joints of the axial body, joints of the upper extremity, and joints of the lower extremity. Includes an explanation of anatomical and physiological terminology that is needed for work in the musculoskeletal field.
