NP Notes: Nurse Practitioner's Clinical Pocket Guide by - -

NURS 530 requires 180 hours of practice. A clinical practicum experience must be completed in each life-stage course. Students are expected to identify a Nurse Practitioner or physician to act as a preceptor for each clinical course. Preceptor requests must be submitted to the Faculty of Health Disciplines six months prior to starting each course.

Master of Nursing: Nurse Practitioner - Athabasca University

Alongside the holistic assessment skills module, this educational programme will provide the practitioner with key skills to deliver community agendas, providing care close to home. Supervision and assessment from a designated GP or Nurse Practitioner is essential within this module in order to meet the 78 hours clinical practice requirement.

Advanced Practice (Clinical) Masters degree - MSc - ARJ

Nurse practitioners who are a fan of Cliffs Notes will be drawn to the simplicity of the Family Practice Notebook app. Succinct outlines get right down to the details primary care and emergency NPs need in practice. The Family Practice Notebook collection is updated monthly and contains more than 6,000 topic pages. The app can be purchased with a monthly subscription fee of \$1.99 or an annual fee of \$19.99.

Put this handy guide to work in class, in clinical, and in practice. From screening and assessment tools and differential diagnosis through the most commonly ordered drugs and billing and coding, this volume in the Davis Notes Series presents the information you need every day in a pocket-sized resource.

Your one-stop source for class, clinical, and practice. This pocket-sized, quick reference resource gives you easy access to the information you need to deliver safe and effective care, including screening and assessment tools, differential diagnosis charts, commonly ordered medications, billing and coding information and more. Now with information on Covid-19, the 4th Edition of this AJN Book of the Year Award Winner has been completely revised and updated to reflect the latest changes in the field.

Must-have information! With an emphasis on prescribing and using tests to diagnose disorders, the information you need every day.

A Daviss Notes book, NP Notes provides nurse practitioner students and clinicians easy access to the information most commonly needed in clinical practice. It will be organized in tabs that focus on the areas for which nurse practitioners are responsible, mainly screening, assessing, diagnosing and treating medical conditions and coding for optimal revenue.

A wealth of screening tools, including DHHS Health Screening Guidelines for Men & Women - Medicare Preventative Services - Guidelines for Cholesterol Management - CAGE - RAFFT Questionnaire - and more! American Heart Association's 2020 CPR, ACLS, and PALS guidelines Coverage of 42 commonly encountered disorders Clinical assessment pearls. Differential diagnosis charts for the most common disorders seen in clinical practice. Coverage of complementary and alternative therapies. Billing and coding information, including CPT codes, ICD-10 codes, and more.

Are you a student in need of an organized solution for your clinical notes? The Student Nurse Clinical Notebook was created just for you! Keep all of your patient encounters organized by clinical rotation and date. Each daily clinical sheet has everything you need to keep track of every patient you care for during clinicals. An extra page for notes is included for each daily clinical sheet so you will have plenty of room to jot down clinical pearls, something you learned that day, or any other information that will help you grow from a student nurse to nurse. Best of all, once your clinical semester is complete you'll have a notebook that contains all of your clinical information without sorting through mounds of paperwork or worry about losing anything. Everything will be in one handy notebook to make for easy uploading to your clinical tracking system.

A guide to making decisions in clinical settings. It coaches you as you analyze 30 of the most common patient complaints and rule out each differential until you reach the correct diagnosis. It features charts and guidelines pertaining to the lab x-rays; EKG interpretation, skin/wound care and pediatric medications, and screening tools.

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.
