Community-based occupational therapy is the practice of engaging in therapy designed to touch upon the source or the basis of various afflictions. Instead of identifying symptoms for treatment, community-based occupational therapists work with the elderly in order to identify the underlying issues that cause specific problems and focus on treating the underlying

Occupational therapy practice in community settings is broad, and programs are unique to each community and practitioner working in the community. Occupational therapy interventions move “beyond the individual treatment of a client to working with systems that affect the ability of an individual or group to achieve work, leisure, and social goals” (Brownson, 1998, p. 61).
