Integrators of LEDs, Lasers, Sensors, and Microdisplays. For the last two decades, our engineers have been on the forefront of developing new products based on high brightness LEDs, lasers, sensors, detectors, and advanced microdisplays. With experience and success integrating LEDs, lasers, sensors and microdisplays into numerous commercial products, Greenlight is very often recommended as a preferred design house partner for many leading opto-electronic component suppliers.

Opto-Electronic and Auxiliary Instrumentation OAC's Optec SSP-4 infrared photometer A telescope is simply a light collector; for a scientific usage some auxiliary equipment needs to be coupled to it, for example photometers, spectrographs, CCD cameras, and so on. At OAC we have various opto-electronic devices that can be coupled to our telescopes.
