Oxygen-Ozone therapy is a complementary  
approach less known than homeopathy and

This book clarifies that, in the often nebulous field of natural medicine, the biological bases of ozone therapy are totally in line with classical biochemistry, physiological and pharmacological knowledge. Ozone is an oxidizing molecule, a sort of super active

Moreover, by inducing nitric oxide synthase, ozone therapy may mobilize endogenous stem cells, which will promote regeneration of ischemic tissues. The description of these phenomena offers the first comprehensive picture for

As told by award-winning New York psychoanalyst, acclaimed holistic health consultant, and author Jane G. Goldberg, Ph.D., Jay

rediscovered a forgotten ancient science that was once well-known to our prehistoric ancestors: the healing power of low-level radioactivity. The concept of using low-dose radiation for therapeutic purposes, called in medical literature "radiation hormesis," has 100 years of solid scientific research behind it, and thousands of medical studies to

Radiation hormesis is easy, affordable, and highly effective. If you're like most people, you're afraid of radiation, and all it implies. Yet, in other countries all over

This is book 2 of 5 of the “ Understand Cancer ” series. It is based on the best-available science. The SECONDARY causes of cancer were discussed in book one. This book continues from book one and discusses the PRIME cause of cancer as discovered by Nobel Prize Laureate Dr.

# Get Free Ozone Steam Sauna Hocatt Transdermal

Otto Warburg—considered by many as the founder of modern biochemistry. “ There are prime and secondary causes of diseases. For example, the prime cause of the plague is the plague bacillus, but secondary causes of the plague are filth, rats, and the fleas that transfer the plague bacillus from rats to man. By a prime cause of a disease I mean one that

is found in every case of the  
disease...Cancer, above all other diseases,  
has countless secondary causes. But, even  
for cancer, there is only one prime cause.  
Summarized in a few words, the prime cause  
of cancer is the replacement of the  
respiration of oxygen in normal body cells  
by a fermentation of sugar. All normal body

cells meet their energy needs by respiration of oxygen, whereas cancer cells meet their energy needs in great part by fermentation. All normal body cells are thus obligate aerobes, whereas all cancer cells are partial anaerobes. From the standpoint of the physics and chemistry of life this difference between normal and cancer cells is so great

that one can scarcely picture a greater difference. Oxygen gas, the donor of energy in plants and animals is dethroned in the cancer cells and replaced by an energy yielding reaction of the lowest living forms, namely, a fermentation of glucose. ” —Dr. Otto Warburg
