How Cars Work is a completely illustrated primer describing the 250 most important car parts and how they work. This mini test book includes wonderfully simple line drawings and clear language to describe all the automotive systems as well as a glossary, index, and a test after each chapter. How Cars Work provides the basic vocabulary and mechanical knowledge to help a reader talk intelligently with mechanics understand shop manuals, and diagnosis car problems. Tom Newton guides the reader with a one topic per page format that delivers information in bite size chunks, just right for teenage boys. How Cars Work was the most stolen book at Kennedy High School in Richmond California! Teachers like our title and so do librarians. The History channel, Modern Marvels-2000, Actuality Productions, Inc is using How Cars Work to train staff for a documentary on automobiles.

"Le Corbusier, who famously called a house 'a machine for living,' was fascinated--even obsessed--by another kind of machine, the automobile. His writings were strewn with references to autos ... In his 'white phase' of the twenties and thirties, he insisted that his buildings be photographed with a modern automobile in the foreground. Le Corbusier moved beyond the theoretical in 1936, entering (with his cousin Pierre Jeanneret) an automobile design competition, submitting plans for 'a minimalist vehicle for maximum functionality,' the Voiture Minimum. Despite Le Corbusier's energetic promotion of his design to several important automakers, the Voiture Minimum was never mass-produced. This book is the first to tell the full and true story of Le Corbusier's adventure in automobile design. Architect Antonio Amado describes the project in detail, linking it to Le Corbusier's architectural work, to Modernist utopian urban visions, and to the automobile design projects of other architects including Walter Gropius and Frank Lloyd Wright. The story is supported by many images and documents, including architects' favorite cars, sketches and models of the Voiture Minimum, and copies of Le Corbusier's correspondence with prospective manufacturers."--Dust jacket.
