So you're getting comfortable with HTML, CSS and JavaScript? You're up for the next challenge? The PHP programming language coupled with the MySQL database is the final step toward making a complete application. Many commercial e-commerce sites, membership sites and even online communities use PHP. Once you learn PHP online you can use this free technology to build just about any type of web presence you can imagine. If you're a mobile developer, you need to learn PHP and MySQL too. Most mobile devices consume web-based services. There is no easier way to create web services designed to be consumed by mobile devices than PHP-- guaranteed! In this PHP and MySQL book you'll join master trainer Mark Lassoff as you learn all of the major concepts that beginning PHP developers need to master. You'll be able to code along with Mark as he demonstrates everything from simple PHP commands to more advanced database applications. Each lesson features a companion lab exercise, which will help you retain, reinforce and remember each concept in the course. So are you ready to learn PHP?

Introductory textbook covering all the main features of the 'web programming' languages PHP and MySQL together with detailed examples that will enable readers (whether students on a taught course or independent learners) to use them to create their own applications or understand existing ones. A particular focus is the use of PHP to generate MySQL commands from a script as it is executed. Each chapter includes aims, a summary and practical exercises (with solutions) to support learning. Chapters are designed to stand alone as far as possible, so that they can be studied independently of the rest of the text by those with some previous knowledge of the languages. There is a comprehensive glossary of technical terms, together with extensive appendices for quick reference of language features.
