Special Tests - Physical Therapy Haven  
There are many physical tests, or ' special tests ', that are used by clinicians in physical therapy, and orthopedics / orthopaedics in general, during a physical examination. These tests are used to rule in or out specific musculoskeletal problems. They help in the differential diagnosis of orthopedic conditions and injuries.

Your physical therapist will test and screen for other, more serious conditions that could cause shoulder pain. To provide a definitive diagnosis, your physical therapist may collaborate with an orthopedic physician or other health care provider, who may order further tests, such as an X-ray to confirm the diagnosis and to rule out other damage to the shoulder, such as a fracture.
