The Piper PA-23, named Apache and later Aztec, is a four-to-six-seat twin-engined light aircraft aimed at the general aviation market. The United States Navy and military forces in other countries also used it in small numbers.

*Piper PA-23 - Wikipedia*

The PA 23-150 Apache hit the market in 1954, evolved to 160-hp engines in 1957, then leaped to 235 hp per side as simply a lower-powered version of its offspring, the 250-hp Aztec, which had debuted in 1960. The last year of Apache production was 1965, for the Aztec had stolen its thunder. Some 2,047 Apaches were built over the years.

*Piper PA-23-235 Apache Performance Information*

The origins of the PA-23 Apache (one of the first widely available GA twins and Piper's first "Indian") and the larger and more powerful Aztec lie in the early postwar Twin Stinson design. Piper acquired the assets of Consolidated Vultee's Stinson Aircraft division in 1948, and inherited a design study for a modern four place light twin.

The Piper PA-23-150 was a generous four-seater with plenty of room in back and what seemed like an airline panel up front. Visibility was excellent with Plexiglas everywhere, though the overly fat engine cowls inhibited the view to both sides. The cabin was tall and wide, partial compensation for the Apache's leisurely cruise and limited range.

The Aztec, or (Aztruck) as its affectionately known, is Piper's most respected twin of all. Specifically, the PA-23-250 Aztec is a true six-seater which was derived from the PA-23 Apache but with larger engines and a bigger tailplane, an all-moving stabilator replacing the Apache's conventional fixed surface/elevators.

*Flight test: Piper PA-23-250 Aztec - Pilot*

The Piper PA-23, named Apache and later Aztec, is a four-to-six-seat twin-engined light aircraft aimed at the general aviation market that also saw service with the United States Navy and other countries' military forces in small numbers.The Apache and its more powerful development the Aztec were manufactured from 1952-1981
