In adult physical rehabilitation, the transformative learning theory presents the basis for a detailed model of Meaning Perspective Transformation in Physical Rehabilitation based on research evidence, with examples and cases, and presents directives for clinical applications. This book draws from the theoretical background of transformative learning in adult education (Mezirow) to discuss the expansion and transfer of knowledge to clinical rehabilitation and community health rehabilitation settings for rehabilitation interventions. It also presents ground breaking findings of a fifteen-year research project on the process of meaning perspective transformation with client/patient groups. The project generated the first model of transformative change in the field of physical rehabilitation, built on the results of successive, externally funded research projects completed for the first time with various client

populations undergoing interventions in occupational therapy, physiotherapy, and other physical health rehabilitation disciplines. The book is written for clinicians, educators, and students of physical rehabilitation, as well as for those who are interested in helping a loved one deal with personal change. Published in English.

This book is a unique collection of high quality articles analysing legal issues with particular regard to small states. The small states of the world differ considerably in their geography, history, political structures, legal systems and wealth. Nevertheless, because of their size, small states face a set of common challenges including vulnerability to external economic impacts such as changing trade regimes and limited ability to diversify economic activity; limited public and private sector capacity, including the legal and judicial infrastructure; a need for regional co-operation; a vulnerability to environmental changes as well as a limited ability to engage with supranational bodies and the forces of globalisation. This is the first volume of an exciting and unique new series, The World of Small States. In this work, legal experts from small jurisdictions and those with a particular interest in legal issues facing small states explore inter alia ethics in small jurisdictions, legal education and the profession in small states, the challenges facing small states with mixed legal systems, the constitutional arrangements in small states, small states as tax havens, and intellectual property and competition law issues.
