This edition of 'Microbiology' provides a balanced, comprehensive introduction to all major areas of microbiology. The text is appropriate for students preparing for careers in medicine, dentistry, nursing and allied health, as well as research, teaching and industry.

Microbiology: A Systems Approach is an allied health microbiology text for non-science majors with a body systems approach to the disease chapters. It has become known for its engaging writing style, instructional art program and focus on active learning. We are so excited to offer a robust learning program with student-focused learning activities, allowing the student to manage their learning while you easily manage their assessment. Detailed reports show how your assignments measure various learning objectives from the book (or input your own ), levels of Bloom's Taxonomy or other categories, and how your students are doing. The Cowan Learning program will save you time and improve your students success in this course.

The Laboratory Exercises in Microbiology, 5e by Pollack, et al. presents exercises and experiments covered in a 1 or 2-semester undergraduate microbiology laboratory course for allied health students. The labs are introduced in a clear and concise manner, while maintaining a student-friendly tone. The manual contains a variety of interactive activities and experiments that teach students the basic concepts of microbiology. The 5th edition contains new and updated labs that cover a wide array of topics, including identification of microbes, microbial biochemistry, medical microbiology, food microbiology, and environmental microbiology.
