To clean it, first engage the softener's bypass valve to shut off the water. Next, relieve the water pressure by running the softener through a manual regeneration. Finally, remove the caps on both sides of the softener head. Thoroughly clean the injector (right side of the head) and the injector screen (left side).

How to Repair a Water Softener (DIY) | Family Handyman

The TwinTec water softener is said to have, "the most efficient regeneration, which only uses 17 litres of water per regeneration only in 10 minutes". This initially sounds good. Take an example, a TwinTec water softener selected for your home that has a water hardness of say 300 parts per million.
