Through rich analysis of the main characters in "The Death of a Salesman, The Secret Sharer, The Last Tycoon," and other stories, Badaracco addresses complex issues leaders face, such as the soundness of their vision, their readiness to take on responsibility, the depth of their compassion, and their ability to manage success.

Are you the type of leader people want to follow? You can be—but first, you've got to understand what sets great leaders apart from all the rest. Certainly, leaders need people skills, execution skills, a deep knowledge of industry trends, the ability to articulate a vision, and more—they must be competent—but that's just the tip of the iceberg. What's below the waterline? What's deep inside the best leaders that makes them different? Mark Miller contends it is their leadership character. In his latest enlightening and entertaining business fable, he describes the five unique character traits exhibited by exceptional leaders and how to cultivate them. *The Heart of Leadership* begins with young and ambitious Blake Brown being passed over for a desperately wanted promotion, despite an outstanding individual performance. Confused and frustrated, he turns to his former mentor, Debbie Brewster. Rather than attempting to solve Blake's problem for him, she sends him on a quest to meet with five of his late father's colleagues, each of whom holds a piece of the puzzle he's trying to solve. As Blake puts the pieces together, he discovers that in the final analysis, a lack of skills isn't what holds most leaders back; skills are too easy to learn. Without demonstrated leadership character, however, a skill set will never be enough. Most often, when leaders fail to reach their full potential, it is an issue of the heart. This is Blake's ultimate revelation. This book shows us that leadership needn't be the purview of the few—it is within reach for millions around the world. *The Heart of Leadership* is a road map for every person who desires to make a difference in the lives of others and become a leader people want to follow.

The authors have conducted extensive research into the role of business in public life. This book takes a practice-oriented look at corporate citizenship, and uses real, behind-the-scenes examples from well-known companies to show that for many firms social responsibility is becoming more integrated into corporate strategy.

Badaracco (business ethics, Harvard) observes that the most effective leaders are rarely public heroes or high-profile champions of causes. His study of "quiet leadership," carried out over four years, presents a series of stories describing quiet leaders at work and drawing practical lessons for executives and aspiring corporate leaders. The cases include a hospital CEO dealing with a case of sexual harassment; a bank president under pressure to remove underperforming but longtime employees; and a high-tech marketing rep who learned that his company was dumping obsolete equipment on its small customers. This is a provocative contribution to contemporary ethical theory challenging foundational conceptions of character.

Following Thomas Jefferson from the drafting of the Declaration of Independence to his retirement in Monticello, Joseph J. Ellis unravels the contradictions of the Jeffersonian character. He gives us the slaveholding libertarian who was capable of decrying miscegenation while maintaining an intimate relationship with his slave, Sally Hemmings; the enemy of government power who exercised it audaciously as president; the visionary who remained curiously blind to the inconsistencies in his nature. *American Sphinx* is a marvel of scholarship, a delight to read, and an essential gloss on the Jeffersonian legacy.

How to Resolve the Really Hard Problems Every manager makes tough calls—it comes with the job. And the hardest decisions are the “gray areas”—situations where you and your team have worked hard to find an answer, you’ve done the best analysis you can, and you still don’t know what to do. But you have to make a decision. You have to choose, commit, act, and live with the consequences and persuade others to follow your lead. Gray areas test your skills as a manager, your judgment, and even your humanity. How do you get these decisions right? In *Managing in the Gray*, Joseph Badaracco offers a powerful, practical, and even radical way to resolve these problems. Picking up where conventional tools of analysis leave off, this book provides tools for judgment in the form of five revealing questions. Asking yourself these five questions provides a simple yet profound way to broaden your thinking, sharpen your judgment, and develop a fresh perspective. What makes these questions so valuable is that they have truly stood the test of time—they’ve guided countless men and women, across many centuries and cultures, to resolve the hardest questions of work, responsibility, and life. You can use the five-question framework on your own or with others on your team to help you cut through complexities, understand critical trade-offs, and develop workable solutions for even the grayest issues.

This book is about why character and ethics do matter. While many authors of leadership books attempt to answer tough questions about leadership with sweeping generalizations, the authors chose instead to focus on one simple premise: Doing the right thing and making the right leadership decisions is based on a leader's character. That focus is what the book is about and a major key to leadership success.

## Read Book Questions Of Character Illuminating The Heart Of Leadership Through Literature

This book focuses on the element of leadership that has largely been neglected in the literature: character. Often thought to be a subjective construct, the book demonstrates the concrete behaviors associated with different character dimensions in order to illustrate how these behaviors can be developed, and character strengthened. Based on research involving over 300 senior leaders from different industries, sectors and countries, Crossan, Seijts, and Gandz developed a model for leadership character that focuses on eleven dimensions. The book begins by setting the context for the focus on character in business, asking what character is and whether it can be learned, developed, molded or changed. Next, the book focuses on each dimension of leadership character in turn, exploring its elements and the ways in which it can be applied in a business setting. The book concludes with a summary of the key insights, an exploration of the interactions between the character dimensions, and a call to the reader to reflect on how to develop one's own and others' leadership character. Bridging theory and management practice, *Developing Leadership Character* will interest students and practitioners alike. Readers will benefit not only from a new, robust theoretical framework for leadership character, but will also learn how character can be developed further.
