Unlike most paper items, paper cups can't be recycled because they're actually coated in plastic—as little as five percent per cup. That's why they're able to hold liquid without leaking all over the place. It's also why they don't get broken down into pulp and turned into recycled paper. While some communities do recycle materials like paper coffee cups, they're very rare.

—Elizabeth Royte, author, *Garbage Land* and *Bottlemania* Like many people, Beth Terry didn't think an individual could have much impact on the environment. In *Plastic-Free*, she shows you how you can too, providing personal anecdotes, stats about the environmental and health problems related to plastic, and individual solutions and tips on how to limit your plastic footprint. Presenting both beginner and advanced steps, Terry includes handy checklists and tables for easy reference, ways to get involved in larger community actions, and profiles of individuals—Plastic-Free Heroes—who have gone beyond personal solutions to create change on a larger scale. Fully updated for the paperback edition, *Plastic-Free* also includes sections on letting go of eco-guilt,
