Review of Sesame Value Chain in Ethiopia | Semantic Scholar

Sesame is a major cash crop, which is mainly produced as an export crop. A long value chain characterizes sesame value chain in Ethiopia, which includes producers, village traders or collectors, brokers/wholesalers, oil millers, exporters, retailers and local consumers. Smallholders in the Ethiopian sesame seeds value chain depend on intermediaries, due to the small quantities to be sold and lack of efficient market information system.

It was an interactive session in which a gender analysis of the sesame value chain was done by the workshop participants jointly and in cooperation with representatives of the Sesame Business Network (SBN).

Based on Africa's deep rooted structural problems, the key aspect of a transformative regional integration is how to promote structural transformation by adapted strategies and policies for the African regional

File Type PDF Review Of Sesame Value Chain In Ethiopia list

economic communities, for the Continental Free Trade Area, and for the Tripartite Free Trade Area. Regional integration in Africa is based on a conventional (linear) model, starting with trade preference zones and moving to free trade areas, customs unions, and monetary and economic zones, with the ultimate goal to reach political unity. Specific problems of a more transformative regional integration agenda are discussed, such as: food security and agriculture; industry development, enterprise growth and competition; and economic partnership agreements with extra-regional partners. In the final section, the impact of three global value chains of importance for Africa (diamonds, shea butter, and sesame) are considered on regions, on sub-regions, and on regional integration. (Series: African Development Perspectives Yearbook, Vol. 18) [Subject: African Studies, Economics

Paraguay has achieved strong and resilient growth and made progress across a range of development outcomes since it emerged from a prolonged period of economic and political instability in the early 2000s. In 2014, the country adopted its first National Development Plan, setting course towards ...

Despite multiple past efforts, fragile Sub-Saharan African economies such as those of Mali, Chad, Niger, and Guinea still rank among the least diversified worldwide, with natural resources constituting a high share of their gross domestic product or exports. Large-scale production of gold for Mali, oil for Chad, uranium for Niger, and bauxite for Guinea offers substantial opportunities, but also has major shortcomings. Conclusive evidence shows poor economic performance

File Type PDF Review Of Sesame Value Chain In Ethiopia list

by resource-rich but fragile Sub-Saharan African countries. The primary reason is not only their high vulnerability to external shocks, but the greed or grievances that typically lead to rents appropriation by a small group of elites in countries that are prone to conflict. Leveraging Export Diversification in Fragile Countries explores the following questions: What are Mali's, Chad's, Niger's, and Guinea's main constraints to export diversification as perceived by key exporting firms? How it could be beneficial for these countries to target certain emerging export products? Are their current interventions to promote global value chain (GVC) adequate? What lessons can be extracted from specific cases? How can trade and logistic policies favor (or hamper) export diversification † " led growth? The book lays the groundwork for effective step-by-step multidimensional policies to propel export diversification in fragile economies that are hindered not only by poor governance and weak institutions, but also by their landlocked position (except Guinea), small domestic markets, and business-unfriendly environments. Recognizing that traditional project interventions in these countries have had limited success, mainly due to their unidimensional focus on single components of an agricultural value chain, the book proposes a GVC 2.0 cluster-based approach to export diversification, in which complementary efforts attract foreign firms and public investment in support of agribusiness. Promising pilot examples of joint implementation plans among multiple donors, risk-sharing facilities, and agribusiness clusters provide valuable insights into recent global value chain developer interventions.

File Type PDF Review Of Sesame Value Chain In Ethiopia liste

The literature on commercial transformation of smallholders makes little distinction between market orientation (production decision based on market signals) and market participation (sale of output). This paper analyzes the determinants of market orientation and market participation in Ethiopia separately and examines if market orientation translates into market participation. Empirical results show that market orientation translates strongly into market participation. The key implication of this study is that policy, technological, organizational and institutional interventions aimed at promoting commercial transformation of subsistence agriculture should follow two-pronged approach: improving market orientation of smallholders at production level, and facilitating market entry and participation of households in output and input markets. Focusing on either may not be as effective in achieving the transformation.

Takes an in-depth look at twenty-six economic and social development successes in Sub-Saharan African countries, and addresses how these countries have overcome major developmental challenges.

UNCTAD Science, Technology and Innovation Policy Reviews (STIP Reviews) are an analytical and policy learning process for country s science, technology and innovation (STI) stakeholders to reach a clearer understanding of the key strengths and weaknesses of their innovation systems and identify strategic priorities for its development. The result of this process is documented in the STIP review document and considered at the United Nations Commission on Science and Technology for Development (CSTD). The

File Type PDF Review Of Sesame Value Chain In Ethiopia list

STIP Review of Ethiopia was prepared at the request of the Government to assist the Ministry of Innovation and Technology (MINT) in preparing a new STI policy.

After an initial assessment of constraints to development in Myanmar found in Volume I, this Volume II assesses key issues and makes policy recommendations.

This book challenges the common European notions about African migration to Europe and offers a holistic understanding of the current situation in Africa. It advocates a need to rethink Africa-Europe relations and view migration and borders as a resource rather than sources of a crisis. Migrant movement from Africa is often misunderstood and misrepresented as invasion caused by displacement due to poverty, violent conflict and environmental stress. To control this movement and preserve national identities, the EU and its various member states resort to closing borders as a way of reinforcing their migration policies. This book aims to dismantle this stereotypical view of migration from Africa by sharing cutting-edge research from the leading scholars in Africa and Europe. It refutes the flawed narratives that position Africa as a threat to the European societies, their economies and security, and encourages a nuanced understanding of the root causes as well as the socioeconomic factors that guide the migrants' decision-making. With chapters written in a concise style, this book brings together the migration and border studies in an innovative way to delve into the broader societal impacts of both. It also serves to de-silence the African voices in order to offer fresh insights on African migration – a discourse dominated

File Type PDF Review Of Sesame Value Chain In Ethiopia list

hitherto by the European perspective. This book constitutes a valuable resource for research scholars and students of Border Studies, Migration Studies, Conflict and Security Studies, and Development Studies seeking specialisation in these areas. Written in an accessible style, it will also appeal to a more general public interested in gaining a fuller perspective on the African reality.

It is becoming increasingly evident that a strong focus on digitalisation as a means to drive agricultural transformation is bearing dividends in the forms of increased production, better livelihoods, more efficient value chains and ultimately greater food and nutrition security. Digitalisation is also key to attracting youth back to agriculture. The use of a wide range of technologies – from mobile phones to drones – is helping smallholders gain access to the information and data they need to transform their businesses. One of the goals in CTA 's 2016 – 2020 Strategic Plan was to reach 1 million farmers, and a focus on digitalisation is helping us to achieve that. In many of our activities, there is a strong focus on supporting youth and promoting women empowerment.
