Rolls-Royce, the British jet engine manufacturer, said Thursday that it plans to slash 1,370 jobs as part of COVID-19 cuts that could ultimately shrink the company's workforce by more than 9,000.

Rolls-Royce, wounded by pandemic, moves to axe 1,370 jobs ...

The Rolls-Royce Trent is a family of high-bypass turbofans produced by Rolls-Royce. It continues the three spool architecture of the RB211 with a maximum thrust ranging from 61,900 to 97,000 lbf. Launched as the RB-211-524L in June 1988, the prototype first ran in August 1990. Its first variant is the Trent 700 introduced on the Airbus A330 in March 1995, then the Trent 800 for the Boeing 777, the Trent 500 for the A340, the Trent 900 for the A380, the Trent 1000 for the Boeing 787, the Trent XW

Rolls-Royce Trent - Wikipedia

The Rolls-Royce RB.23 Welland was Britain 's first production jet engine. It entered production in 1943 for the Gloster Meteor. The name Welland is taken from the River Welland, in keeping with the Rolls-Royce policy of naming early jet engines after rivers based on the idea of continuous flow, air through the engine and water in a river.

Rolls-Royce Welland - Wikipedia

The Rolls-Royce RB.41 Nene is a 1940s British centrifugal compressor turbojet engine. The Nene was a complete redesign, rather than a scaled-up Rolls-Royce Derwent with a design target of 5,000 lbf, making it the most powerful engine of its era. It was Rolls-Royce's third jet engine to enter production, and first ran less than 6 months from the start of design. It was named after the River Nene in keeping with the company's tradition of naming its jet engines after rivers. The design saw relativ

Rolls-Royce Nene - Wikipedia

The engine was fitted into the MiG-15 and was fully operational in time for the Korean War, taking to the skies with weaponry designed to take down B-29 Superfortress bombers. A B-29 Bomber in the gunsights of a MiG-15. It was the dominant fighter over Korea until the introduction of the American F-86 Sabre.
