Scientific Journals Impact Factor Ranking

The impact factor is beneficial, but when it comes to quality, then the use of the impact factor is not right. According to the database of the year 2017, the journal citation reports, tracked the impact factor for nearly 12, 298 journals. According to the database, out of the 12, 298 journals, just 239 titles, or 1.9 percent journals that were tracked by the JCR, impact factor of 10 or higher.

SCImago Journal Rank is an indicator, which measures the scientific influence of journals. It considers the number of citations received by a journal and the importance of the journals from where these citations come. SJR acts as an alternative to the Journal Impact Factor (or an average number of citations received in last 2 years).

Where should I publish ...
The Journal Impact Factor should be used with informed peer review. In the case of academic evaluation for tenure, it is sometimes inappropriate to use the impact of the source journal to estimate the expected frequency of a recently published article. Again, the Journal Impact Factor should be used with informed peer review.
