Introduction This is my attempt to consolidate all the tough & useful questions we can have regarding "Selenium" using "Python". This is similar to my previous attempt for creating a basic book on Python "_Frequently Asked Interview Questions : Core Python_" where I am consolidating FAQ's on **Core Python** only. I have two main objectives in writing this book, - First is it helps you find your next destination ;) and - Second it acts as a guide for learning Selenium through simple tasks. In order to achieve the second one, I have consolidated the list of questions in the appendix at the end. You can try to read the question and find the solution (*Thanks **Abhishek** for suggesting it *) yourself and later check the answer, if you think your found answer is better, do email it to me ([mayankjohri @ gmail . com](mailto:mayankjohri@gmail.com)), so that I can add it in this book. **NOTE** :arrow_right: *This book will **only cover selenium** and will not cover any questions for Testing Frameworks such as PyTest etc. I will be creating another book on that topic in near future.* That book will extensively cover Testing Frameworks and nothing else. :) **Future Plans:** Plan is to have more than 501 questions with answers once the final version is released by end of 2018. > **Current Status:** 101 Questions have been added in various sections. **POM** & **best practices** have the least and will be adding more in future versions and "Cross browser testing" section is almost empty :(
