A polygon is a 2D shape that has three or more straight sides and angles (for example, a rectangle). A non-polygon is a 2D shape with sides that are not all straight (for example, a semicircle). When talking about 2D shapes, encourage your child to use language like straight, curved, side, and corner (or vertex/vertices) to describe them. This will help them to understand the properties of 2D shapes and to know how they differ from 3D shapes.
