153. Steel Rule.-One of the most frequently  
used measuring tools is the steel rule, or  
machinist's rule. This measuring instrument  
enables work to be laid out accurately, holes  
located correctly, and distances and sizes  
measured with precision, and is therefore one  
of the most important tools in the engine  
room.

-It is logical to include hand fire extinguishers in a lesson that deals with engine-room tools, because they actually are the tools that are immediately at hand to combat fire aboard ship. When the existence of a fire in its early stages is noted, the prompt use of some kind of hand fire extinguisher is of the utmost importance.

## **Ship Engine Room Equipment - repo.koditips.com**

Equipment Engines. The engine room of a motor vessel typically contains several engines for different purposes. Main, or propulsion engines are used to turn the ship's propeller and move the ship through the water. They typically burn diesel oil or heavy fuel oil, and may be able to switch between the two. There are many propulsion arrangements for motor vessels, some including multiple engines ...
