The traditional way to
short-sell involves selling
a borrowed asset in the
hope that its price will go
down and buying it back
later for a profit.

Borrowing the asset
comes at a cost, which is
normally a small
percentage of the
asset ' s price. Short-

Short selling is more than a necessary evil. It makes markets become more transparent and efficient.

The incentive to short sell allows for the truer pricing of financial assets.

If there was no short selling, there would be numerous fake-priced assets that can even expose a market to greater risks, such as a bubble.
