Sickle cell anaemia and malaria. An

Access Free Sickle Cell Anemia A Fictional Reconstruction Answer

interesting point about sickle cell malaria is related to the locations where the disease is so common. The distribution of sickle cell anaemia is across Africa, Pakistan, India and some parts of the Middle East. This also happens to match the areas where malaria is prevalent. Carriers of the faulty gene responsible for sickle cell anaemia are less susceptible to malaria as the malaria parasite multiplies inside normal blood cells.
