The key to creating smart communities

Esri's smart community information system establishes four technology tenets governments need to deliver smart communities and smart cities. These four tenets are interdependent and made up of complimentary networks of data, solutions, implementations, training, and partners. Founded in location, fueled by data, and designed to improve decision-making, this system works to improve the world

Smart Communities & Cities | Plan Your Smart Strategy ...

The term smart applied to populated areas, especially cities, but not only these, aims both to meet municipal management needs and citizen participation as well as to improve the quality of life in an integral way. In this sense, without a doubt, Smart City encompasses the Smart Community, and also in reverse.

Citizens and Local Leaders
Can Use ...

Smart communities focus on civic inclusion. Governments and citizens rely on each other to meet the community's needs and shape its future. What occurs in a community is inherently geographically personal—everyone who lives in a place cares about that place. Esri's GIS-based smart community information system provides an
