factors (i.e. excessive acidity or alkalinity, the presence of toxic substances, poor physical properties or an excess or deficiency of water.

Soil Fertility: Definition, Types and Factors | Soil Science

Download File PDF Soil Fertility And Land

One reason why soil health is being restored with P–W–C–M is that land productivity is twice that of W–F (Anderson, 2009a); the increased plant biomass added to soil accelerates soil restoration (Shaver et al., 2003). Resources are also used more efficiently.
