Strategy Maps: Converting Intangible Assets into Tangible ...
What are Strategy Maps? Description. In the 2001 book "The Strategy-Focused Organization", Kaplan and Norton transform their Balanced Scorecard. In 1992 they introduced the Balanced Scorecard in the Harvard Business Review as system to measure performance; now they change it to a strategic management system. A lot of this transformation was done by further emphasizing the so called Strategy Map.

The authors of "The Balanced Scorecard" and "The Strategy-Focused Organization" present a blueprint any organization can follow to align processes, people, and information technology for superior performance.

More than a decade ago, Robert S. Kaplan and David P. Norton introduced the Balanced Scorecard, a revolutionary performance measurement system that allowed organizations to quantify intangible assets such as people, information, and customer relationships. Then, in The Strategy-Focused Organization, Kaplan and Norton showed how organizations achieved breakthrough performance with a management system that put the Balanced Scorecard into action. Now, using their ongoing research with hundreds of Balanced Scorecard adopters across the globe, the authors have created a powerful new tool—the "strategy map"—that enables companies to describe the links between intangible assets and value creation with a clarity and precision never before possible. Kaplan and Norton argue that the most critical aspect of strategy—implementing it in a way that ensures sustained value creation—depends on managing four key internal processes: operations, customer relationships, innovation, and regulatory and social processes. The authors show how companies can use strategy maps to link those processes to desired outcomes, evaluate, measure, and improve the processes most critical to success, and target investments in human, informational, and organizational capital. Providing a visual "aha!" for executives everywhere who can't figure out why their strategy isn't working, Strategy Maps is a blueprint any organization can follow to align processes, people, and information technology for superior performance.

The creators of the Balanced Scorecard apply their proven approach to corporate level strategy and offer a framework for aligning all of a company's individual business units with the organizations' overall strategy to ensure optimal business performance.

In a world of stiffening competition, business strategy is more crucial than ever. Yet most organizations struggle in this area—not with formulating strategy but with executing it, or putting their strategy into action. Owing to execution failures, companies realize just a fraction of the financial performance promised in their strategic plans. It doesn't have to be that way, maintain Robert Kaplan and David Norton in The Execution Premium. Building on their breakthrough works on strategy-focused organizations, the authors describe a multistage system that enables you to gain measurable benefits from your carefully formulated business strategy. This book shows you how to: Develop an effective strategy—with tools such as SWOT analysis, vision formulation, and strategic change agendas Plan execution of the strategy—through portfolios of strategic initiatives linked to strategy maps and Balanced Scorecards Put your strategy into action—by integrating operational tools such as process dashboards, rolling forecasts, and activity-based costing Test and update your strategy—using carefully designed management meetings to review operational and strategic data Drawing on extensive research and detailed case studies from a broad array of industries, The Execution Premium presents a systematic and proven framework for achieving the financial results promised by your strategy.

In today's business environment, strategy has never been more important. Yet research shows that most companies fail to execute strategy successfully. Behind this abysmal track record lies an undeniable fact: many companies continue to use management processes-top-down, financially driven, and tactical-that were designed to run yesterday's organizations. Now, the creators of the revolutionary performance management tool called the Balanced Scorecard introduce a new approach that makes strategy a continuous process owned not just by top management, but by everyone. In The Strategy-Focused Organization, Robert Kaplan and David Norton share the results of ten years of learning and research into more than 200 companies that have implemented the Balanced Scorecard. Drawing from more than twenty in-depth case studies-including Mobil, CIGNA, Nova Scotia Power, and AT T Canada-Kaplan and Norton illustrate how Balanced Scorecard adopters have taken their groundbreaking tool to the next level. These organizations have used the scorecard to create an entirely new performance management framework that puts strategy at the center of key management processes and systems. Kaplan and Norton articulate the five key principles required for building Strategy-Focused Organizations: (1) translate the strategy to operational terms, (2) align the organization to the strategy, (3) make strategy everyone's everyday job, (4) make strategy a continual process, and (5) mobilize change through strong, effective leadership. The authors provide a detailed account of how a range of organizations in the private, public, and nonprofit sectors have deployed these principles to achieve breakthrough, sustainable performance improvements. Presenting a practical, proven framework steeped in rich case study experience, The Strategy-Focused Organization helps solve a universal management problem-not just how to formulate strategy, but how to make it work. Building on one of the most revolutionary business ideas of our time, this important book shows how today's leaders can shape their own companies to meet the challenges and reap the rewards of a new competitive era. Robert S. Kaplan is the Marvin Bower Professor of Leadership Development at Harvard Business School. David P. Norton is President of Balanced Scorecard Collaborative, Inc.

This collection highlights the most important ideas and concepts from Robert S. Kaplan and David P. Norton, authors of The Balanced Scorecard, a revolutionary performance measurement system that allows organizations to quantify intangible assets such as people, information, and customer relationships. Also included are Strategy Maps, which enables companies to describe the links between intangible assets and value creation with a clarity and precision never before possible, The Execution Premium, which describes a multistage system to help companies to gain measurable benefits from carefully formulated business strategy, and The Strategy-Focused Organization, which introduces a new approach to make strategy a continuous process owned not just by top management, but by everyone.

The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard—financial measures, customer knowledge, internal business processes, and learning and growth—offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard, in the second part, they describe the steps organizations must take to build their own Scorecards; and, finally, they discuss how the Balanced Scorecard can be used as a driver of change.

Created in Excel, balanced scorecards enable you to monitor operations and tactics, while operational dashboards is a set of indicators regarding the state of a business metric or process—both features are in high demand for many large organizations. This book serves as the first guide to focus on combining the benefits of balanced scorecards, operational dashboards, performance managements, and data visualization and then implement them in Microsoft Excel.

This book provides an easy-to-follow roadmap for successfully implementing the Balanced Scorecard methodology in small- and medium-sized companies. Building on the success of the first edition, the Second Edition includes new cases based on the author's experience implementing the balanced scorecard at government and nonprofit agencies. It is a must-read for any organization interested in achieving breakthrough results.
