The SAS Enterprise Miner Survival node is located on the Applications tab of the SAS Enterprise Miner tool bar. The Survival node performs survival analysis on mining customer databases when there are time-dependent outcomes. Some examples of time-dependent outcomes are as follows:

SAS Help Center: Survival Analysis

Introduction to Survival Analysis in SAS. 1. Introduction. Survival analysis models factors that influence the time to an event. Ordinary least squares regression methods fall short because the time to event is typically not normally distributed, and the model cannot handle censoring, very common in survival data, without modification.
