In the mid to late 2000s, the time before tablets reigned supreme, MID was used to refer to a sort of middle-of-the-road device between a smartphone and a laptop or netbook in size and functionality: something handheld and highly portable, with a bigger screen than a smartphone so that you could more easily view and interact with full-sized Web pages, but smaller than a laptop so that you could slip it into a coat pocket and use it anywhere. It could have a small built-in keyboard, a touch ...
