Evaluation is essential to library management: it provides the data that underlies informed and effective decision-making. This book is a one-volume, how-to guide to library evaluation techniques, planning, and reporting.

- Provides specific directions for writing surveys, conducting interviews, and performing a wide range of evaluation techniques, accompanied by examples to follow
- Covers the evaluation of library's electronic and physical collections, face-to-face and virtual service, and facilities
- Supplies a framework and specific tools for proving your library's value and improving how it operates
- Lays out a clear methodology for quantifying and demonstrating progress towards an objective: measure, analyze, and report

Based around a theme of the construction of a game engine, this textbook is for final year undergraduate and graduate students, emphasising formal methods in writing robust code quickly. This book takes an unusual, engineering-inspired approach to illuminate the creation and verification of large software systems. Where other textbooks discuss business practices through generic project management techniques or detailed rigid logic systems, this book examines the interaction between code in a physical machine and the logic applied in creating the software. These elements create an informal and rigorous study of logic, algebra, and geometry through software. Assuming prior experience with C, C++, or Java programming languages, chapters introduce UML, OCL, and Z from scratch. Extensive worked examples motivate readers to learn the languages through the technical side of software science.

This Teacher Support file comprehensively supports the New National Framework Mathematics 8* pupil book, which is an ideal resource for lower ability pupils targeting National Curriculum Levels 4 -5.

Authored by nationally recognized scholar and behavioral consultant Dr. John W. Maag, this book focuses primarily on students' observable behaviors and the environmental factors that affect their expression. As Maag points out, behavior management is probably one of the most misunderstood concepts in education. Written in a very accessible style, this book demystifies stereotypical beliefs and misconceptions regarding the use of reinforcement, punishment, and self-control. Maag offers clear, but detailed descriptions of proven intervention techniques, supplemented by a range of step-by-step guidelines, sample forms, charts, graphs, and illustrations that assist teachers in implementing the techniques. Although the techniques described in the book are based on a sound theoretical and empirical foundation, the author limits the use of technical jargon and infuses real-life examples and case studies that clarify and illuminate the presentation.
