Tekla Structures makes it easy to model bridges efficiently and accurately. Get to know the workflow with the free Tekla Structures for Bridge Designers eLearning course. The course includes several tutorials, from the basics of the workflow, user interface and the Bridge Creator tool to using ready-made components and bridge embeds.

Tekla 2020

Precast Fabrication. Tekla Structures 20 offers precast concrete fabricators new and better tools for more productive modeling and detailing. Organize the model, manage fabrication packages and purchase more efficiently with improved workflow tools. Model and modify filigree, hollow-core, and other precast slabs with the new, intuitive floor tool, and modify your single reinforcement bars, bar groups, and meshes faster and easier than ever.

Tekla Structures 20

Tekla Structural Designer includes all the critical information needed to fully automate design to an engineer's chosen building code so less time is spent processing analysis data. APT Engineering standardize calculation with Tedds
