Provides in-depth analysis of the life, works, career, and critical importance of Elizabeth Bowen.

Summary Fast ASP.NET Websites delivers just what it promises—practical, hands-on guidance to create faster, more efficient ASP.NET sites and applications. This book offers step-by-step .NET-specific examples showing you how to apply classic page optimization tips, ASP.NET-specific techniques, and ways to leverage new HTML5 features. About the Technology There's a real cost to inefficient HTTP requests, overloaded data streams and bulky scripts. Server throughput is a precious commodity and seconds—even tiny fractions of a second—can seem like an eternity while a visitor waits for your site to load. As an ASP.NET developer, there are dozens of techniques you can apply immediately to make your sites and applications faster. You'll find them here. About this Book Fast ASP.NET Websites delivers just what it promises—practical, hands-on guidance to create faster, more efficient ASP.NET sites and applications. This book offers step-by-step .NET-specific examples showing you how to apply classic page optimization tips, ASP.NET-specific techniques, and ways to leverage new HTML5 features. Readers should be familiar with basic HTML, CSS, and ASP.NET concepts. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. What's Inside Drastically improved response times Tips for Webforms and ASP.NET MVC sites Optimizing existing pages .NET-specific examples About the Author Dean Hume is a software developer and blogger based in the U.K. A passionate techie, he created the ASP.NET HTML5 toolkit and blogs regularly about web performance at www.deanhume.com. Table of Contents PART 1 DEFINING PERFORMANCE High-speed websites First steps toward a faster website PART 2 GENERAL PERFORMANCE BEST PRACTICES Compression Caching: The sell-by date Minifying and bundling static files HTML optimization tips Image optimization ETags Content Delivery Networks PART 3 ASP.NET-SPECIFIC TECHNIQUES Tweaking ASP.NET MVC performance Tweaking ASP.NET Web Forms performance Data caching

The founder of the nonprofit organization Wine to Water, dedicated to bringing clean water to people in need throughout the world, traces how an unlikely trip to Darfur inspired his efforts to build economical water-containment systems.

Once upon a time, Moses had had enough. Exhausted by the challenge of leading the Israelites from slavery to the Promised Land, Moses cried out to God, "What have I done to displease you that you put the burden of all these people on me? . . . If this is how you are going to treat me, please go ahead and kill me" (Exodus 11:11, 15). If that sounds hauntingly familiar to you, you may be the senior pastor of a contemporary church. The burden of Christian leadership is becoming increasingly unbearable--demanding skills not native to the art of pastoring; demanding time that makes sabbath rest and even normal sleep patterns seem extravagant; demanding inhuman levels of efficiency, proficiency and even saintliness. No wonder pastors seem and even feel less human these days. No wonder they burn out or break down at an alarming rate; no wonder the church is missing the mark on its mission. In Creating a Missional Culture, JR Woodward offers a bold and surprisingly refreshing model for churches--not small adjustments around the periphery of a church's infrastructure but a radical reversioning of how a church ought to look, from its leadership structure to its mobilization of the laity. The end result looks surprisingly like the church that Jesus created and the apostles cultivated: a church not chasing the wind but rather going into the world and making disciples of Jesus.

This series covers the entire scope of rotary drilling operations in five units of technical information and review questions. These units are published in cooperation with the International Association of Drilling Contractors. In some cases, previous editions are available in Spanish, while supplies last, for \$14. Open-book comprehensive tests covering Units I, II, III, and V of the Rotary Drilling Series are available. This totally rewritten lesson deals with the proper handling and maintenance of the crown and traveling blocks and the drilling line. It also covers inspection procedures for equipment and programs for increasing drilling line service life. All measurements are given in both U.S. and SI units. Illustrations, summary boxes, and study questions enhance the student's learning experience.

Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking. Historically, universities were run by their academic communities but as mass higher education has taken root, as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown, pressure has mounted for a ' modernisation ' of governance structures. One aspect of ' modernisation ', particularly important in many European systems, and in Japan, has been the decision by governments to give institutions greater autonomy, more control over their budgets and legal responsibility for the employment of their staff. International trends to introduce greater competition between institutions, to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership, a more systematic involvement of external stakeholders and a more ' corporate style of governance. At the same time this has often led to a sense of loss of collegiality, a redistribution of authority and a growing gap between the ' centre ' and the ' periphery ' within universities. This book analyses governance change in nine major higher education systems, Australia, Finland, France, Germany, Italy, Japan, Norway, the UK and the USA, each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical, cultural, political and social characteristics of the different systems. Michael Shattock is a leading authority on university governance; this study offers the most up to date account of governance reform in a range of higher education systems, an analysis of the common trends and an assessment of their impact on the idea of a university. It will be essential reading for academics, postgraduates and practitioners in higher education.

The global economy is witnessing previously unseen levels of competitiveness, forcing business leaders to contend with unprecedented challenges. No longer can companies seize and hold a customer base by operating adequately. In order to enjoy a competitive advantage, an organization must operate at exemplary levels of performance in every facet of business and maintain that degree of excellence indefinitely. This is achieved through careful alignment of operational systems and the use of innovative process management initiatives. " Unless an organization is uniquely qualified to deal with its customers by understanding its own strengths and weakness. " writes internationally renowned operational management expert Christopher K. Ahoy. " it will be unable to understand what is required to move from the current paradigm of doing business. " In Customer-Driven Operations Management, Ahoy distills the most current business theories and practices that will help you weed out and eliminate operational inefficiencies and put in place the necessary metrics for providing products and services better, cheaper, and faster than ever. Ahoy walks you through the steps of creating a world-class organization, which include Mapping your company's processes to target weak points Realigning management systems from functional to process-focused Setting benchmarks throughout the process to help quantify levels of success Establish a system of knowledge management for the seamless alignment of teams and departments Improving process management using Lean, Six Sigma, and other methodologies Create a sound strategic planning initiative to eliminate future surprises With diagrams and figures to highlight salient points, Customer-Driven Operations Management clarifies and simplifies the otherwise daunting task of enacting major changes in your company's operations systems.

Health Canada's Pest Management Regulatory Agency (PMRA) has granted conditional registration for the sale and use of mandipropamid and Revus Fungicide containing the technical grade active ingredient Mandipropamid Technical Fungicide to control downy mildew on Brassica crops, bulb vegetables, grapes, leafy vegetables; blue mould on spinach; late blight on tomatoes, tomatillos and potatoes; suppression of phytophthora blight on peppers and suppression of downy mildew on cucurbits. This report summarizes the information that was evaluated and provides the results of the evaluation as well as the reasons for the registration decision, with an outline of the additional scientific information required from the applicant. It also describes the conditions of registration that the applicant must meet to ensure that the health and environmental risks as well as the value of these pest control products are acceptable for their intended use. The Overview describes the key points of the evaluation, while the Science Evaluation section provides detailed technical information on the human health, environmental and value assessments of Mandipropamid Technical Fungicide and Revus Fungicide.--Includes text from document.

Afraid of her foster father's advances, fifteen-year-old Sylvia flees and is aided by Walter and Vic who have different motives for helping her.
