And she included the poem “ The Man Watching, ” by Rainer Maria Rilke. As I sat on the brick stoop reading the words, I felt a strange certainty, as if I were falling. I was hearing someone actually articulate a space for uncertainty, melancholy, and suffering that sounded current, electric. This kind of thinking is what I wanted.

Acclaimed poet and translator Robert Bly here assembles a unique cross – cultural anthology that illuminates the idea of a larger – than – human consciousness operating in the universe. The book's 150 poems come from around the world and many eras: from the ecstatic Sufi poet Rumi to contemporary voices like Kenneth Rexroth, Denise Levertov, Charles Simic, and Mary Oliver. Brilliant introductory essays trace our shifting attitudes toward the natural world, from the "old position" of dominating or denigrating nature, to

Duffy, Karen Black, Kathryn Ananda-Owens, James Hanson.

Since 1980, Jungian psychologist Bill Plotkin has been guiding men and women into the wilderness ? the redrock canyons and snow-capped mountains of the American Southwest ? but also into the wilds of the soul. He calls this work soulcraft. There's a great longing in all people ? a longing to uncover the secrets and mysteries of our individual lives, to find the unique gift we were born to bring to our communities, and to experience our full membership in the more-than-human world. This journey to soul is a descent into layers of the self much deeper than personality, a journey meant for each one of us, not just for the heroes and heroines of mythology. A modern handbook for the journey, Soulcraft is not an imitation of indigenous ways, but a contemporary nature-based approach born from the landscape of the Southwest, the traditions of Western culture, and the cross-cultural

heritage of all humanity. Filled with stories, poems, and guidelines, Soulcraft introduces over 40 practices that facilitate the descent to soul, including dreamwork, wilderness vision fasts, talking across the species boundaries, council, self-designed ceremony, nature-based shadow work, and the arts of romance, storytelling, and soul-infused poetry.

Addressing the pervasive longing for meaning and fulfillment in this time of crisis, *Nature and the Human Soul* introduces a visionary ecopsychology of human development that reveals how fully and creatively we can mature when soul and wild nature guide us. Depth psychologist and wilderness guide Bill Plotkin presents a model for a human life span rooted in the cycles and qualities of the natural world, a blueprint for individual development that ultimately yields a strategy for cultural transformation. If it is true, as Plotkin and others observe,

that we live in a culture dominated by adolescent habits and desires, then the enduring societal changes we so desperately need won't happen until we individually and collectively evolve into an engaged, authentic adulthood. With evocative language and personal stories, including those of elders Thomas Berry and Joanna Macy, this book defines eight stages of human life — Innocent, Explorer, Thespian, Wanderer, Soul Apprentice, Artisan, Master, and Sage — and describes the challenges and benefits of each. Plotkin offers a way of progressing from our current egocentric, aggressively competitive, consumer society to an ecocentric, soul-based one that is sustainable, cooperative, and compassionate. At once a primer on human development and a manifesto for change, *Nature and the Human Soul* fashions a template for a more mature, fulfilling, and purposeful life — and a better world.

Daniel Deardorff knows otherness firsthand. This highly regarded “ singer ” in the old sense of that word—musician, storyteller, maker of ritual—had polio as an infant and has used a wheelchair most of his life, giving him a lived perspective that deeply informs his views on this subject. In *The Other Within*, Deardorff starts with a radical notion: to disclose the blessings of outsiderhood, the many gifts and insights contributed to culture by the marginalized and outcast. Unlike studies that stress the plight of the outsider, this one asserts that to be cast down and out of the consensus-worldview affords a difficult yet significant opportunity: to encounter oneself, not as defined by society but as one actually is. An eloquent spokesman for “ the man or woman on the weird road, ” Deardorff presents dozens of powerful examples from myth and literature to illustrate his message in a richly

allusive, complex series of essays. Drawing on the work of mythologists, poets, psychologists, and scholars, *The Other Within* takes readers on an initiatory journey, uncovering the roots of human identity and imagination and offering insights – including “trickster wisdom” —revealing the mythic underpinnings of everyday life. This second edition includes updated text, a new introduction, and a helpful glossary.
