In "The New New Thing" Lewis focuses on Jim Clark's ascent in the world of Silicon Valley entrepreneurship and Clark's persistent pursuit of the titular "new new thing." Explaining the how's, why's, and differences between the old way of doing things and the new (or new new) way of doing things can be tricky, because it assumes you have some understanding of how the old (or old old) way of doing things works.

In the weird glow of the dying millennium, Michael Lewis sets out on a safari through Silicon Valley to find the world's most important technology entrepreneur, the man who embodies the spirit of the coming age. He finds him in Jim Clark, who is about to create his third, separate, billion-dollar company: first Silicon Graphics, then Netscape—which launched the Information Age—and now Healtheon, a startup that may turn the \$1 trillion healthcare industry on its head. Despite the variety of his achievements, Clark thinks of himself mainly as the creator of Hyperion, which happens to be a sailboat . . . not just an ordinary yacht, but the world's largest single-mast vessel, a machine more complex than a 747. Clark claims he will be able to sail it via computer from his desk in San Francisco, and the new code may contain the seeds of his next billion-dollar coup. On the wings of Lewis's celebrated storytelling, the reader takes the ride of a lifetime through this strange landscape of geeks and billionaires. We get the inside story of the battle between Netscape and Microsoft; we sit in the room as Clark tries to persuade the investment bankers that Healtheon is the next Microsoft; we get queasy as Clark pits his boat against the rage of the North Atlantic in winter. And in every brilliant anecdote and character sketch, Lewis is drawing us a map of markets and free enterprise in the twenty-first century.

Why does Windows work the way it does? Why is Shut Down on the Start menu? (And why is there a Start button, anyway?) How can I tap into the dialog loop? Why does the GetWindowText function behave so strangely? Why are registry files called "hives"? Many of Windows' quirks have perfectly logical explanations, rooted in history. Understand them, and you'll be more productive and a lot less frustrated. Raymond Chen--who's spent more than a decade on Microsoft's Windows development team--reveals the "hidden Windows" you need to know. Chen's engaging style, deep insight, and thoughtful humor have made him one of the world's premier technology bloggers. Here he brings together behind-the-scenes explanations, invaluable technical advice, and illuminating anecdotes that bring Windows to life--and help you make the most of it. A few of the things you'll find inside: What vending machines can teach you about effective user interfaces A deeper understanding of window and dialog management Why performance optimization can be so counterintuitive A peek at the underbelly of COM objects and the Visual C++ compiler Key details about backwards compatibility--what Windows does and why Windows program security holes most developers don't know about How to make your program a better Windows citizen

"As artist Harry Dodge initiates a research project about machine intelligence, he abruptly finds himself contending with the decline and death of his father from dementia, the renovation of a bewildering but powerful connection to his birth-mother, and the vicissitudes of artistic practice--its strange solitude and sociality. Under these pressures, the quotidian begins to tear, which allows a portal--perhaps activated by an iron meteorite Dodge orders on eBay--to open, and he rushes into it. The artist sets up an experiment: he vows to leave his studio and risk contact with unfamiliar people in order to put himself in touch with the magic that derives when humans connect. Grief and unease become catalysts for a reckoning with the vital forces of matter and--related--the bafflement of belonging. My Meteorite is a lyrical and provocative investigation into how we are shaped by ineffable forces we cannot know. Structured around a series of formative, formidable coincidences in Dodge's life, My Meteorite journeys from Barthes to "Blade Runner," from punk to Pale Fire. It is a wild, incandescent book that creates a literary universe of its own. At its heart lies the question of what it takes to love something, to deem its existence valuable (be it a robot, a stranger introduced as family, or a person with dementia). Blending the personal and the philosophical, the raw and the surreal, Harry Dodge re-enchants our world, illuminating the ways large and small coincidences make daily life shimmer into magic"--

Life is a trip and pain is a transportation technique for men who have not forgotten whence they came from yet still know where they are going. Judges 19:17 It's remarkable that the vision speaks of the end, but who and what shall take us through the vicissitudes and mayhem of this short life while we try to figure out who we are, what do we posses and how can we serenely accomplish Thee Dream, it is the Teething process that defines how, it comes with pain nevertheless it will make your jawbone muscular and put down new teeth.
