The Principles of Scientific Management is a monograph published by Frederick Winslow Taylor. This laid out Taylor's views on principles of scientific management, or industrial era organization and decision theory. Taylor was an American manufacturing manager, mechanical engineer, and then a management consultant in his later years. The term "scientific management" refers to coordinating the ...

~~The Principles of Scientific Management – Wikipedia~~

The principle of use of science for rule of thumb is the starting point that distinguishes scientific management from traditional management. Under scientific management decisions are made on the basis of acts as developed by the application of scientific method to the problem concerned.

~~Principles of Scientific Management : 6 Principles~~

Scientific management has at its heart four core principles that also apply to organizations today. They include the following: Look at each job or task scientifically to determine the “one best way” to perform the job. This is a change from the previous “rule of thumb” method where workers devised their own ways to do the job.

~~Scientific Management | Principles of Management~~

The aim of scientific management is to see maximum prosperity for employer and employees. It is important only when there is opportunity for each worker to attain his highest efficiency. Maximum output & optimum utilization of resources will bring higher profits for the employer & better wages for the workers.

~~Principles of Scientific Management~~

The basic principles of Scientific Management can be summarized as follows: Rule-of-thumb working methods should be replaced with methods based on a scientific study of the tasks. Individual workers should be selected, trained, and developed to complete specific tasks, rather than leave them to their own skills and passively training themselves.

The scientific management approach propounded by F.W. Taylor is based upon the following four principles: (1) Science, Not Rule of Thumb: This principle says that we should not get stuck in a set routine with the old techniques of doing work, rather we should be constantly experimenting to develop new techniques which make the work much simpler, easier and quicker.
