C.J. Date, ... Nikos A. Lorentzos, in Time and Relational Theory (Second Edition), 2014. This chapter is the first of three devoted to reviewing the basics of relational theory. It explains relations as such, as well as the supporting notion of types (aka domains), in considerable depth. With regard to types; it discusses values, variables, operators, parameters, arguments, expressions, and polymorphism; equality and assignment; system defined vs. user defined types; scalar vs. non-scalar ...

**Relational Theory—an overview | ScienceDirect Topics**

In physics and philosophy, a relational theory is a framework to understand reality or a physical system in such a way that the positions and other properties of objects are only meaningful relative to other objects. In a relational spacetime theory, space does not exist unless there are objects in it; nor does time exist without events. The relational view proposes that space is contained in objects and that an object represents within itself relationships to other objects. Space can be defined

Relational models theory (RMT) is a theory of interpersonal relationships, authored by anthropologist Alan Fiske and initially developed from his fieldwork in Burkina Faso. RMT proposes that all human interactions can be described in terms of just four "relational models", or elementary forms of human relations: communal sharing, authority ranking, equality matching and market pricing (to ...
