This study analyses the
various types and stages of
conflict that have been
experienced by diverse
groups and generations of
Karen over the six decades
of armed conflict between
the Karen National Union
(KNU) and successive Burmese
governments. Instead of
focusing on those who are
internally displaced, those
in the refugee camps on the
Thai-Burma border or living
abroad, or those in the KNU,
it places particular
emphasis on the "other"
Karen, or the majority
segment of the Karen

population living inside
Burma, a population that has
hitherto received little
scholarly and journalistic
attention. It also assesses
the Karen people's varied
attitudes toward a number of
political organizations that
claim to represent their
interests, toward successive
Burmese military regimes,
and toward the political
issues that led to the
original divide between
"accommodators" and
"rebels." This study argues
that the lifestyles and
strategies that the Karens
have pursued are diverse and
not confined to armed
resistance. Acknowledging
these multiple voices will

an introduction to the
methodological aspects of
logistics systems management
and is based on the rich
experience of the authors in
teaching, research and
industrial consulting. This
new edition puts more
emphasis on the
organizational context in
which logistics systems
operate and also covers
several new models and
techniques that have been
developed over the past

decade. Each topic is illustrated by a numerical example so that the reader can check his or her understanding of each concept before moving on to the next one. At the end of each chapter, case studies taken from the scientific literature are presented to illustrate the use of quantitative methods for solving complex logistics decision problems. An exhaustive set of exercises is also featured at the end of each chapter. The book targets an academic as well as a practitioner audience, and is appropriate for advanced undergraduate and graduate courses in
