Trees played a particularly important part in the rural economy of Anglo-Saxon England, both for wood and timber and as a wood-pasture resource, with hunting gaining a growing cultural role. But they are also powerful icons in many pre-Christian religions, with a degree of tree symbolism found in Christian scripture too.

The second part, [Trees and Woodland in the Anglo-Saxon Landscape](#), is in many ways the most satisfying, and represents a distillation of Hooke's research on the early medieval countryside. Most work on medieval landscapes takes a broad chronological view in order to recognise changes in the countryside, but Hooke's approach demonstrates how the complexity of the landscape can be appreciated through the (more temporally restricted) charters.

A tree as rendered on the Bayeux Tapestry. The vast forested areas grew colossal numbers of trees such as hazel, oak, ash, beech, and many others. The condition of the soil in any one area would dictate the species of tree that inhabited those zones, in much the same way that they do today. Modern man's intervention and modification of the landscape has to a great extent affected what grew where and when.

The fauna of Anglo-Saxon England was plentiful and varied, and included some animals that have since been made extinct in this country. The vast areas of uninhabited forests, heaths and fells were home to many creatures, in addition to the other wild creatures that inhabited the towns and villages including the domestic animals.

Trees were of fundamental importance in Anglo-Saxon material culture - but they were also a powerful presence in Anglo-Saxon religion before and after the introduction of Christianity. This book shows that they remained prominent in early English Christianity, and indeed that they may have played a crucial role in mediating the transition between ancient beliefs and the new faith.
