In this comprehensive guide to pottery Kenneth Clark explains with the help of practical and informative text together with step-by-step illustrations and examples of finished work the various aspects of pottery. These include techniques of wedge making, pinching, coiling, slab building, throwing, joining, moulding and turning. In addition Clark gives full details on techniques of decoration, tools and equipment, kilns and firing, glazes, pigments and stains finishing with a full glossary. He also suggests ways in which potters can extend their techniques of production to meet the needs of changing markets and conditions, whilst trying to keep a balance between the work of the artist innovator and the production potter or ceramicist.

Whether young artists aspire to become pilots or captains—or simply love all manner of moving machines—Learn to Draw Planes, Choppers & Watercraft, a new title in Walter Foster 's award-winning instructional drawing series for children, features a little bit of something for everyone. Using basic shapes as a starting point, artists will learn to draw a range of exciting, realistically rendered moving machines—from an original Wright brothers ' flyer and vintage ocean steamer to a rescue chopper and commercial jetliner. Engaging snippets of text accompany each drawing subject, while additional fun facts about select subjects round out this unique artistic adventure.

This book is about the PC Patrol Craft that fought in World War II. Almost 50,000 men served on 361 of them. Even so, PCs received little acclaim. One naval historian called them 'The Forgotten Fleet'. So that the world will not forget them, the author, a former PC sailor wrote this book. He tells the story of PCs in World War I and draws from his and his shipmates' experiences and memories. He uses old photos and drawings and from them describes what life was like for 65 men crowded aboard these small ships. He portrays the fearful times when tossed and torn by raging seas. He recounts the terrifying battles against submarines and kamikazes and when leading landing craft to the invasion beaches.

What Are Best Friends For? More than anything, Summer Patterson wants a baby. What she doesn't want is a husband. Thankfully, her best friend, Ryder McClain, makes the perfect sperm donor. Ryder is loyal, undeniably sexy and the one man she trusts—the only reason she agrees to conceive their baby naturally. When baby-making nights with Summer blaze like the West Texas sun, Ryder feels the heat. He never expected Summer to say yes to sharing his bed. Now he's falling for her—and the prospect of fatherhood—while hiding a secret that could destroy her faith in him forever.

Blaze Werla is having a typical summer. He lives in the country with his father and grandmother. He spends his days alone, wandering around the hill beside his home. Then the message appears on the side of the hill. And Blaze's summer suddenly takes a turn toward the mysterious. By the time Blaze meets Joselle Stark, the unexpected seems almost normal.

Substantial encouragement for this volume came from the editors and readers of the Studies for Phenomenological and Existential Philosophy (SPEP) at Northwestern University Press. But its publi cation has been made possible only by the unqualified and un abridged acceptance of the Editorial Board of Phaenomen%gica, which at the time was still headed by its founder, the late Professor H. L. Van Breda, who welcomed the manuscript most generously. This makes his untimely passing even more grievous to me. The stylistic copy editing and proof reading were handled ef ficiently by Ruth Nichols Jackson, secretary of the Philosophy Department. In the proof reading I also had the able help of my colleague Stanley Paulson. I dedicate this book to the memory of my late brother, Dr. chern. Erwin Spiegelberg, at the time of his death assistant professor at the University of Rio de Janeiro, who preceded me by two years in emigrating from Nazi Germany. When in 1938 he put an end to his life in an apparent depression, he also did so in order not to become a burden to his brothers, who were on the point of following him. Whatever I, more privileged in health and in opportunities in the country of my adoption, have been able to do and achieve since then has been done with a sense of a debt to him and of trying to live and work for him too.

Contains color and black and white photographs taken over a twenty-four hour period in the United States.

Health technologies for personalized medicine have become important enablers for monitoring and treatment in both inpatient and outpatient care. The benefits of these technologies lead not only to improvements in medical services quality for all stakeholders, but also to new healthcare business models, promising a better containment of healthcare costs. This book presents the proceedings of the 2013 pHealth Conference, held in Tallinn, Estonia, in June 2013. The pHealth conferences have established themselves as the leading international conference series on wearable or implantable micro and nanotechnologies for personalized medicine and health service provision. pHealth 2013 proceeds in bringing together a dynamic emerging professional community from Europe and beyond. The keynotes, invited speeches and oral presentations in this book address these wearable technologies, and also other topics such as health games, terminologies and ontologies, medical decision support, monitoring of environmental and living conditions, as well as social and ethical issues. We are at the beginning of what promises to be revolutionary change in healthcare offering significant opportunities for both patients and healthcare providers. This book will therefore be of interest to the entire healthcare industry.
