A positive result means you had coronavirus when the test was done. If your test result is positive, you must self-isolate immediately. If you had a test because you had symptoms, self-isolate for at least 10 days from when your symptoms started. If you had a test but have not had symptoms, self-isolate for 10 days from when you had the test.

Why Understanding The Results Of Your  
SEO Efforts Is Crucial?

The T score is another standardised measurement of your score. In the T score, the average score is 50, and the standard deviation is 10, and the score shows how many standard deviations your result is from the mean. So for example if your T score is 60, it is one standard deviation above the norm.
